

Todos somos “Físicos Nucleares”

416 KSW – fácil compreensão
Indice Rápido do 416 KSW; Não verificado pela FK (interpretação pela FK Brasil)

Introdução ao Índice Rápido:

O 416 KSW pode ser direcionado a físicos nucleares e cientistas espaciais de elite, mas isso não é motivo para nos sentirmos deixados de fora. Depois de lê-lo cuidadosamente pela segunda vez, descobri, que é realmente fácil de entender, se você tentar um pouco e se concentrar. A ciência do plasma é para todos, sem dúvida. Mas a implementação do plasma no estado da matéria vai ser tratada por cientistas e pesquisadores para trabalharem e desenvolverem ela. Portanto, não é preciso se assustar com esta aula, ela está repleta de conhecimentos surpreendentes e, superando nossos pensamentos negativos e colocando um pouco de esforço, podemos fazer isso - podemos fazer parte dos desenvolvimentos do plasma em curso agora. O Sr. Keshe contou uma história de como ele trabalha com alguém como um fazendeiro, e ele entende mais do que os professores e doutores, porque ele ama e sente isso dentro dele. É por isso que decidi escrever este Índice Rápido, apesar de ter 8 páginas, se você o ler com amor obterá a essência do mesmo e fará parte do fluxo do conhecimento.

Ele repetiu muitas vezes que é nossa responsabilidade como Buscadores de Conhecimento (BC) nos iluminarmos para entender o Conhecimento da Criação, e compartilhá-lo - caso contrário, seremos privados dele. De fato, isto é o que significa ser um "Methi", um Messias, entender e compartilhar. Ao mesmo tempo, isto é o que significa o Nascimento de Mitra. Do início ao fim desta aula, o Sr. Keshe nos trouxe o círculo completo. O que quero dizer é que ele nos levou para fora e através de toda a complexidade do estado da matéria - e então nos trouxe de volta - e atingiu no meio de nossas almas. Que temos tudo isso dentro de nós e sempre tivemos.

Por favor, tente abrir uma discussão no grupo Keshe Brasil no Telegram ou em qualquer lugar sobre esta aula. É uma alegria tão grande fazer parte disto que carrega a realidade cósmica e desce ao nível que nós, como humanos, podemos entender.

Índice Rápido: (8 páginas)

O homem replicou a natureza com sua Tecnologia; Agora temos que replicar o Plasma; No estado de sonho estamos fisicamente lá com memórias e emoções; Quando transmutamos e transportamos precisamos ser capazes de carregar as emoções com; RNA do campo Megnético carrega memórias de si mesmo; campo Magnético de Plasma pode aumentar ou diminuir a força - pode dobrar, quebrar e ser dividido; Podemos dividir o campo Magnético;
Temos que transmutar o corpo em energia plasmática com todas as suas informações - emoção - e o que ele reuniu em suas células - na Alma do Homem - na dimensão do Plasma da fisicalidade do homem;
Marca de queimadura na pele ainda lá após 50 anos porque não lidamos com a emoção da queimadura - a marca continuava se replicando a cada ciclo de 28 dias;

O Gans usado nas queimaduras satisfaz a emoção para que não reste nenhuma cicatriz;
Você resolveu a emoção que é a interação entre a Alma do Homem & Alma da Fisicalidade;
Nós o transportamos através da emoção plasmática para que seus sentidos funcionem corretamente na chegada, quando o manifestamos novamente na fisicalidade;
Mostra fotos dos sistemas de voo que estão sendo construídos na linha de produção;
Após 2 anos deste pacote de energia de Plasma (vírus) está mutando - as injeções não funcionam; Os cientistas não entenderam o vírus como um Plasma;
Podemos entregar 100 Sistemas de Voo por mês - mas eles serão apenas uma concha, a menos que entendamos e que os cientistas trabalhem juntos para colocar a Nova Tecnologia nestes sistemas.
As autoridades iranianas nunca entenderam o "verdadeiro segredo" nos sistemas da FK;
Criação de plasmas - energias - abrindo e fechando eles;
Fazendo um nêutron e decidindo o tempo de sua divisão;
Entender como criar uma divisão nuclear plasmática é a chave para a utilização de todos os sistemas da FK;
A ciência atual precisa esperar pelo Nêutron se dividir em Próton & Elétron;
Professor Leslie da Queen Mary College – "Mehran, você está muito à frente, você faz perguntas para as quais não temos respostas"; Podemos controlar o tempo de divisão do nêutron; Demorei 50 anos para encontrar as respostas;

A divisão do nêutron vem exatamente da mesma maneira que você carrega a alma; quando você cria a divisão, (é como quando) a Alma da Fisicalidade se separa (da Alma do Homem); e então cria a totalidade de um átomo, ou a fisicalidade do homem; (Todas estas são mudanças no Plasma);
Podemos controlar a mudança do plasma e não deixá-lo para o destino do tempo e do ambiente;

[minha compreensão disto é; que a divisão do nêutron é realmente apenas a mudança do plasma para outra forma, seja a divisão para um Elétron & um Próton para se tornar outro átomo, ou da Alma da Fisicalidade se separando da Alma do Homem, o que chamamos de morte, para passar por um processo para se tornar outra fisicalidade, ou o que ele nos ensinou hoje é que podemos até mesmo voltar ao nêutron original. A diferença é que seremos capazes de controlar o tempo da mudança - não nos matando, mas pelo amor de entender o conhecimento e decidir fazer uma mudança].

Como interferimos em Fukoshima (mais detalhes); Fusão interatômica - compensar as perdas quando o nêutron se divide; Depois poder colocar o elétron de volta com o próton - voltar ao nêutron original (não um diferente que já estava dividido); Isto é o que acontece nos Sistemas de Voo quando nós transmutamos e transportamos para outro destino colocamos o nêutron de volta exatamente do jeito que estava; Isto me veio aos 9 anos de idade sentado na máquina de raio X;
Você viaja para além do estado da matéria da velocidade da luz - acrescenta energia na dimensão da velocidade universal da luz;
A luz da estrela que você vê está vindo instantaneamente, não há milhares de anos - que bobagem;

Nós podemos estar na estrela instantaneamente - fazer parte da estrela se ;

Podemos criar radiação plasmática - criar radiação Alfa o tanto quanto você quiser; Entender a mudança no Plasma é a chave para o próximo passo na evolução; Isto vai colocar um prego no caixão da indústria nuclear; Não ferver água para obter eletricidade - ir direto para a divisão do Plasma para obter energia;
Perdemos a verdade sobre os campos Magnéticos, RNA dos campos Magnéticos, e a divisão destes campos pela emoção dos campos - não pela espera pelas condições; Como a Siemens replica exatamente os mesmos campos em máquinas de raios X para órgãos e tecidos específicos? Podemos replicar isto em nossos sistemas de Plasma - criando radiação de Plasma; O sol e a terra não funcionam assim? Os campos interagem com a Inércia torna-se estado de matéria;

Muitos BC ficarão perdidos nos próximos ensinamentos que são direcionados aos físicos nucleares para trazer mudanças; Quando os cientistas de elite escutam os ensinamentos eles entendem o dilema em que estamos;
Na divisão de neutron que cria 2 elétrons e 1 próton - como gêmeos idênticos no útero da mãe; Temos que entender a criação do Plasma (que é o) neutron (e) o plasma fundamental da criação;
CERN ainda está brincando com gravetos; Você pode criar radiação nuclear em qualquer nível sem prejudicar ou ser absorvido para criar danos nucleares; Isto foi comprovado pela FK em Fukushima; o material Gans absorveu a radiação em Fukushima;
Conhecimento secreto da FK mostrado em Fukushima anos atrás; Fukushima confirmou as teorias - divisão celular e criação de outros campos; Cientistas têm que ter a "alma de entender a Tecnologia" para as próximas máquinas voadoras;
Need to understand Pl condition with the virus - 4th injection in Israel shown to have no effect on virus;
Necessidade de entender a condição do Plasma com o vírus - 4ª injeção em Israel mostrou não ter efeito sobre o vírus;
Somos o criador do plasma fundamental; Dividindo o neutron em elétron e próton - Alma do Homem e fisicalidade do homem; Colocando o elétron de volta no próton este é o Sistema de Voo; Não somos um culto - somos cientistas - isto é uma evolução na ciência;
Quando entramos no Sistema de Voo somos um elétron entrando no próton - protegido, entregue e liberado como um elétron;

O que o homem precisa aprender nos próximos meses; É criar um Plasma que pode segurar a estrutura fundamental do Universo independentemente da posição; (O Plasma permanecerá constante enquanto voar por diferentes campos do espaço); Quando você fecha as portas do Sistema de Voo, ele tem seus próprios campos dentro dele - como quando você coloca comida na boca converte para a condição de Plasma; Temos que ser capazes de controlar como o Sistema de Voo interage com estes campos do lado de fora; O Plasma tem que segurar sua estrutura como o útero da mãe;

Para (governos) chineses e americanos - vocês não serão capazes de fazer isto (os Sistemas de Voo) sozinhos; Porque quando você voa você se torna parte (de um novo

campo dentro) dos campos plasmáticos do sistema; Os físicos são os "leigos" que não entenderam - precisam ser iluminados para o próximo passo;

Uma vez que encaixamos estes sistemas com a última Tecnologia Espacial o homem não é mais um homem - é o Plasma do homem; É a estrutura da compreensão da totalidade; O homem vai mudar; Abra seus olhos - temos que nos tornar o criador e controlador do plasma fundamental; Temos que saber como dividir um Plasma - entregar um Sistema de Voo que carrega emoção - carrega fisicalidade tanto no RNA quanto no DNA; Existe algum lugar para a teologia? Uma nova raça do homem; Isto será um marco para muitos de vocês - dar o próximo passo em transporte e transmutação; Talvez entremos em uma nova dimensão;
Você deve ser capaz de replicar a criação do Plasma Fundamental;

Uma vez que incorporamos o Sistema de Voo com campos de Plasma da Criação - torna-se um Sistema de Voo universal; Pode entregar o homem a qualquer ponto do Universo; Ser capaz de tocar a avó com plena emoção; Tornamo-nos parte dos campos Magnéticos do Universo;

O Plasma Fundamental é a mãe - a criança é a divisão dos campos; Dividindo o Plasma ao mesmo tempo mantendo todas as informações dentro dele; A ciência do homem se abriu para uma nova dimensão de compreensão;
O Plasma Fundamental pode dividir-se e criar um novo Plasma ou voltar ao seu Plasma Fundamental original; (Veja o desenho em 1hr 26min)
Esta pergunta foi colocada a cientistas seniores da indústria nuclear, mas eles não tinham resposta - agora um simples BC tem a resposta – e o conhecimento para criar isto;

Somos uma organização científica - não um culto; Como físico nuclear - a alma é um nêutron;
O elétron continuará a dividir-se e a criar mais novos plasmas;
O Neutron original será o Criador e a Alma do Homem o elétron; Eu fiz o homem à imagem de Mim mesmo; tudo isso veio para o processo de divisão de Mim; Eu posso interagir em qualquer lugar;
99 nomes para Deus no Alcorão - 100 é a totalidade; Ele irradia como um sol; É você e os campos - o Criador irradia entre todos nós;
Porque com uma gota eu posso criar um peixe ou um homem;
Agora você entende a totalidade da Tecnologia do Plasma;
Os BC entenderam como fazer Plasma Fundamental e depois dividi-lo?
Ou você pode fortalecer os campos para ir mais fundo no Plasma;

Eu dei ao homem o direito de entender o conhecimento da criação; Quando o homem entende a totalidade do conhecimento, esta é a manifestação de Mitra;
Você vem de e volta para.

(final da parte 1) Intervalo
Parte 2 :

Para criar coerência entre a Alma da Fisicalidade e a Alma do Homem - em parte é a emoção - é preciso desapego e compreensão disso; Não é preciso doutorado - iluminação em 1 segundo se você entender o princípio - então você pode replicar isto; Às vezes, pessoas pouco instruídas podem entender o Plasma melhor que os professores - eles podem desfrutar de sua existência e compartilhar; Você não precisa de nenhuma máquina ou reatores - crie luz em suas mãos - você é um sistema de Plasma dinâmico; Nós sabemos como acessar energias;

Precisamos ser capazes de montar uma simples compreensão da Tecnologia; as pessoas nas aldeias da Amazônia podem fazer isso em potes - não precisam de reatores nucleares;

É como você interpreta o conhecimento e onde ele o leva; O que você quer ganhar com ele e aceitar e acrescentar a ele - então você não precisa de sistemas; Professor Leslie aprendeu com o Sr. Keshe; Uma vez que você aprende a andar, então você pode correr; Entenda como você quer ampliar o conhecimento - que ele lhe dá o prazer da existência; A alma é o plasma fundamental - é um nêutron; Como eu quero que ele interaja - para dividir - para ser fisicalidade ou Alma da Fisicalidade como um elétron;
Eu entendo a ciência da criação - você pode fazer o mesmo; Não se torne dogmático ou crie limitações em seu pensamento e não tente enquadrar a nova Tecnologia no que lhe foi ensinado nos livros; Você confia no que os outros dizem ou vê a Tecnologia para si mesmo e se torna o criador da próxima condição; A abertura é a chave para a criação; Você não precisa de reatores nucleares para entender a Tecnologia; Dentro de 20 - 30 anos as pessoas usarão a Tecnologia - enquanto agora elas podem não ver o benefício dela; Mas no final - ela está beneficiando a humanidade - esse é todo o propósito dos ensinamentos e do compartilhamento aberto (ao público); Ensine a si mesmo e abra seus olhos para a dimensão completa do trabalho;
Agora podemos explicar como as muralhas de Jericó na Bíblia caíram; Através da emoção de vencer criaram um campo que se equilibrou com o material da parede; Como quando suamos ou nosso corpo cresce;

As pessoas estão perguntando se podemos combater os efeitos colaterais das novas injeções e também do 5G; Sim, podemos, você tem o conhecimento - mas precisamos entender como aplicá-lo; 5G efetuando trem de pouso em aviões; Quando você injeta algo em seu corpo - o mesmo que quando você entra no sistema de voo; Fotos dos Sistemas de Voo na linha de produção na China; Enquanto no estado da matéria - há apenas um homem de pé dentro do Sistema de Voo; Quando colocamos os reatores dentro - ele se torna plasmático e os campos começam a interagir com o ambiente; O cérebro do homem se torna parte da estrutura interna do Sistema de Voo - sua emoção dita onde o sistema se posiciona; Nenhuma organização científica compartilha tão abertamente imagens e conhecimentos como a FK; Campos dentro do Sistema de Voo sustentam e mantêm a vida - campos externos interagem com o planeta ou qualquer ambiente em que ele esteja - para voar;

Dá uma descrição detalhada de como colocar ímãs na mesa e como seus campos interagem uns com os outros - os campos dividem e criam novas posições; o posicionamento MaGrav é criado a partir da divisão dos campos Magnéticos; Os BC não entenderam isso; Frações destes campos Magnéticos dividem e interagem; Não apenas dobram, mas dividem os campos Magnéticos com o novo conhecimento; Nosso corpo divide os campos Magnéticos a cada segundo de sua vida neste planeta, no sistema solar e na galáxia; Para voar no novo Sistema de Voo em uma condição plasmática - todas estas interações e condições de campo têm que ser consideradas e mais para poder entregar o homem à lua intacto como o mesmo homem que deixou a Terra; A menos que a alma do homem decida seguir um caminho diferente; Que condições tenho que manter para que você possa andar livremente na lua sem uma roupa espacial - nós o selamos em um envelope de campos; O que acontece se esta bolha de campos explodir - você sobreviveria? (não foi respondido);

Temos que reunir os cientistas para criar os campos da lua aqui na Terra para que o Sistema de Voo possa voar até a lua; O conhecimento seria ampliado o suficiente até junho de 2022?; Precisamos de uma combinação de conhecimentos para poder fazer este Voo da lua; É por isso que estamos negociando com a NASA - para que os caras da propulsão não tentem assumir o controle - mas estejam abertos para aprender o novo conhecimento; Precisamos considerar que máquina precisamos para fazer o pouso e tudo mais - por que precisamos trabalhar em conjunto com estas agências;

O próximo passo é entender a totalidade, que os campos têm RNA - emoção - e que eles podem ser divididos; não se trata de saber se a luz pode ser dobrada - é se podemos dobrar nossa própria compreensão para ver a realidade;
Aos 9 anos de idade tenho a pergunta em frente à máquina de raios X - aquela coisa (raio) que passa por mim - acrescenta ou tira de mim? - quero ser capaz de controlar o que ela faz;
Como usamos corrente elétrica de estado da matéria, estamos limitados à entidade de estado da matéria; Com o plasma conseguimos condições e posições totalmente diferentes; Quando vi a potência do Plasma e pudemos usar a mesma coisa sem o estado da matéria - eu sabia que o jogo tinha mudado;

Aprendi com a Semana do Blueprint MaGrav - temos que entender a Tecnologia e não ser imitadores; Você pode nos dizer por que quando um homem morre, os olhos olham para cima até o topo da cabeça? (A resposta será dada mais tarde);

Descreve como a luz do dia é criada na terra; Campos entre o sol e a terra esfregam e criam fricção, isto leva à criação de plasmas - alguns destes plasmas são puxados em direção à terra - quando fazem isso, a luz é criada por esta interação; E alguns destes pacotes interagem com a Inércia do estado da matéria da terra e criam matéria na terra;

Sem sombra de dúvida, o centro do sol não é quente como os cientistas acreditam - pode até ser temperaturas geladas; O centro do sol cria uma interação maciça dos campos Magnéticos e Gravitacionais; Essas interações criam 2 condições - primeira condição, quando a energia do campo se torna luz para nós na Terra - mas essa luz não ilumina todo

o sistema solar; segunda condição, criam calor por causa da densidade dessa camada (de superfície). Pacotes de campos também são criados e liberados para o sistema solar; Estas interações também poderiam criar plasma de Hidrogênio na superfície do sol; Tudo não é radiação de campo Magnético do sol, como presumem os cientistas de hoje; Portanto, não criamos Hidrogênio na superfície do sol - criamos um espectro de forças de campo de plasma; Fala-se da teoria da centrífuga do sol; Para onde vão os elementos mais pesados - traça uma linha em direção ao sistema solar; Não pode ser prejudicado - precisa explicar tudo cientificamente;

Cientificamente conseguimos elevação e movimento com reatores nucleares na Tecnologia do Plasma; Vimos a criação da gravidade em nossos reatores; Ao mesmo tempo, não havia calor no centro dos reatores - isto nos confirmou que não há calor no centro do sol; É por isso que começamos a usar reatores de plástico em vez de metal - porque não há calor gerado com a criação do plasma; Isto foi feito por volta de 2007 - explica sobre anéis de latão com tubos para controlar o plasma e coletar dados; Eles podiam controlar as camadas de gases nos reatores; Eles podiam criar uma aura para o reator - que é um campo de radiação fora dele (como a Alma do Homem cria uma aura que irradia fora do corpo); Eles podiam decidir a força da aura; Eu podia decidir se eu queria mesmo uma aura - chamamos de blindagem de campo plasmático para a tecnologia de defesa;

Ele disse à maioria dos oficiais superiores militares americanos - jogue o jogo conosco, nós nos tornamos iguais. Trabalhe contra a FK, você perde. Ele disse: "Sr. Keshe vamos colocar um dos melhores cientistas sobre este assunto muito em breve, porque não temos mais escolha"; porque estamos mudando a Tecnologia para o Arizona, temos que lidar com os militares americanos - e os militares chineses; Eles têm que entender que o jogo mudou; Temos a Tecnologia dispersada de tal forma que só eu sei como e quando trazê-la à tona;

Os reatores de meia cúpula dão estabilidade ao voo - porque não permitimos que os campos do fundo girem; Caso contrário, à mercê do meio ambiente; Por que os novos Sistemas de Voo são planos no fundo - controlamos os campos colocando certos reatores dentro; Em vez de carregar passageiros do fundo, carregamos do lado; Através de reatores, criamos uma esfera através do Plasma; Caso contrário, teríamos que construir um enorme OVNI para criar os campos - em vez disso, o fazemos através de reatores dentro do Sistema de Voo - eu mantenho meus campos;
Sou um gênio no que faço porque entendo a Tecnologia; Somos Mensageiros de Deus e temos acesso ao conhecimento total do Criador;

Eu sou o Methi para aqueles de vocês que duvidaram disso;

Sabemos como levar o homem ao ponto - mas é para vocês entenderem como chegar lá; construímos os sistemas para que os campos criados pela própria nave, como foi discutido anteriormente, não sejam perigosos para o sistema ou para a estrutura do plasma;

O que suporta a vida através da estrutura do sangue, suporta a vida no Universo, de acordo com as interações do campo; Isto é suficiente por enquanto - quando os BC se tornarem mais instruídos, nós lhes ensinaremos mais; Temos que fazer os testes, para que o homem veja que não há mágica;

P: Se algumas partes desaparecerem no momento do transporte e transmutação, como poderemos recuperá-las?
K- Existe uma Tecnologia para isso - com o tempo ensinaremos
Uma das primeiras pesquisas da FK será para corrigir os danos às crianças deficientes no momento do nascimento - quaisquer que sejam os nomes que elas lhe deem; Isto pode ser corrigido durante o primeiro ano de vida; Sim, pode ser feito e nós temos o conhecimento para fazer isso; Podemos fazer o mesmo se algo der errado ao usar o Sistema de Voo - é a mesma situação; A mesma situação é com as injeções "3M" dadas às crianças hoje em dia - corrigir os efeitos colaterais às crianças;

O mesmo com o novo problema de plasma em todo o mundo (vírus) - temos o conhecimento para corrigir os efeitos colaterais; entendemos sobre as novas injeções com materiais diferentes - você pode parar todos os danos e usar a melhor parte dela (da injeção) - a combinação dos dois cria uma bela condição para ser capaz de se recuperar;

P: O que acontece quando você cria um humano no tanque de peixes - ele não tem a história do DNA e do RNA? O que acontece com seu aspecto emocional?
K- Antes de mais nada, não estamos criando novas pessoas. Se o fizermos, elas terão a essência da alma da criação e do Universo;

Esta é a essência da criação de Mitra - primeiro criamos a alma e depois a fisicalidade; Quando você cria a matéria desta forma, você não será capaz de dizer o lugar de origem deles; Como com os diamantes, você pode dizer de que rio eles vieram; Quando você aproveita a energia universal - você cria Mitra; Se nós formos o último homem de pé - criaríamos Mitra para ter um companheiro e um amante; Esta é a profundidade do conhecimento que damos - mas depende do quanto o homem entende; É questionável como Mitra vai se tornar neste planeta (neste momento) - porque é condicionado pelas condições deste planeta;

P: É justo que a Alma do Homem possa ser trazida para um estado baixo, de se tornar um pó no Universo por causa da má conduta da Alma da Fisicalidade?
K- Mesmo que a Alma do Homem esteja enclausurada - ela ainda é responsável pelo homem. Por que quando se é iluminado, você faz coisas boas? A alma tem a responsabilidade do comportamento e conduta do homem; Estranho que a FK tenha se enraizado na área onde ocorreu uma das maiores matanças em massa do planeta; Talvez muitas almas precisem ser elevadas; Nós não sabemos - na dimensão da fisicalidade nunca podemos dizer isso;
A Alma do Homem tem que interagir para se elevar - e é responsável pelo que a Alma da Fisicalidade faz; todos nós podemos matar, estuprar e torturar qualquer um - mas o que diz nossa alma? É errado, não fazemos; não o assustamos com Igreja e Cruz ou Dia do

Julgamento; é a maturidade do homem para permitir que sua alma assuma e seja expandida;

P: Espero que o mundo plasmático esteja atrás de você para fazer o trabalho o mais rápido possível;
K- Sim, 7 bilhões de homens estão se opondo a isso - essa é a parte mais difícil
P: Todos nós fazemos nossas orações ...
K- Não se esqueça de continuar elevando as negociações em Viena; é responsabilidade dos BC e do Conselho Universal;
Nós rompemos - mas precisamos continuar apoiando e expandindo;

P: O que é o Methi, em profundidade?
K- Methi em Farsi - O mundo islâmico é aquele que traz o homem à sua posição correta e traz uma nova vida. Mudar o homem e tudo será perfeito - o homem não cometerá mais crimes; O Prometido que completa o ciclo - traz o paraíso; Nós cumprimos isso trazendo o conhecimento - e não falando; Em essência de base científica, todos vocês sabem como se alimentar - elevar a fisicalidade - e fazer muitas outras coisas sem necessidade de matar; É o momento em que o homem escolhe mudar para o novo caminho; Segundo, é o cumprimento de compreender que o Criador é um por toda a humanidade; As promessas de Methi foram cumpridas pelos ensinamentos da FK; Como BC, todos nós nos tornamos o Methi;
Ao entender os ensinamentos de hoje - a alma e a fisicalidade - Neutron com elétron e próton - Criador e o homem - Estes são todos os mesmos apenas nomes diferentes; A fisicalidade e a alma estão ambas ligadas pela compreensão da ciência - não pela retórica e crenças ocultas que não podem ser explicadas; Quando dizemos que somos Methi - significa que entendemos; Se você entende e não compartilha - é como roubar; Por outro lado, você precisa iluminar uma alma a um nível que ela possa entender e guiar os outros; Este é o trabalho dos BC;
Isso cria um enorme problema para a vida da FK e do Sr. Keshe; Terminar sua vida para que as pessoas não se tornem iluminadas; Porque o conhecimento que compartilhamos cria essa condição de compreensão e esclarecimento para os outros; Os líderes religiosos e os governos têm medo de educar o povo - porque então eles não podem abusar deles; Exemplo do Irã era 90% analfabeto e agora é 95% alfabetizado - eles não podem usar retórica e inventar coisas porque o povo entende. O mesmo com o Vaticano - as pessoas não vão mais à igreja; Esta é a razão pela qual os ensinamentos da FK são banidos de todas as televisões - uma vez que as pessoas entendem que você não pode controlá-los; Não precisamos da televisão para chegar a Alma do Homem - é muito fácil; A Alma do Homem tem que ser educada; Então, quando dizemos que somos Methi - somos todos nós; É seu trabalho entender e compartilhar o conhecimento - caso contrário, você será privado dele;

O Sr. Keshe conta a história de como ele veio para a Áustria e como ela se tornou a sede e o lar da FK; a FK traz especialistas de fora para ajudar; Markray vai iniciar um desenvolvimento maciço nos EUA e pesquisa; Markray está planejando se tornar parte da bolsa de valores da NASDAQ; Esperamos uma expansão maciça em muitas direções; É por isso que, se o Conselho Universal puder realmente fazer seu trabalho corretamente ...;

Nós enviamos Unidades de Aprimoramento de Voo para nações que se tornam jogadores na Tecnologia Espacial - não apenas jogando; A FK é agora uma organização industrial oficial na Áustria; Eu amo a África e tentei me instalar lá muitas vezes.

(:22).
K- … we are trying to progress to understand more about the cycle of changes and creation, and how man has come to progress, in the different ways and means, of the intellectual what I call, structure of the life. As we progress towards creating a flight system (FS), to be able to take man with a machine, or for man to understand more of totality, we come to one point, and if you understand this, (:24). in what happens actually to us, and it is real to every single one of us, then we have to translate this knowledge into the systems we develop, that we can match, we can copy.

We saw the lightening creating fire, we went and tried to understand how the fire starts, and we made tools to make it. We understood how the energy of the atom is creating different conditions by radiation, and we went and created nuclear technology (T). Now we have to understand how, what all of us know, and go through it, more or less on a daily basis, every 24 hours a day, in one form or shape or another. How can we replicate this in the T and the systems that we make, that it works the same. That the fire we make is the same fire, that was made by the lightening and the thunder.

For us, as we develop the space T and we are moving away from moving matter state of the things, into energy state of the things as a plasma (Pl), we have to be able to match and replicate the same. In our daily life we dream. In our sleep we dream. Physically we are there, and our physicality when we are present with our mother, father or a friend, who have died or passed away, or is away from us for years, we carry all the emotion and the knowledge we have with them, in the state of dream. It's not just that we stand there physically, (:26). we remember every conversation we had, when they were alive, when they were with us, and we carry all the emotion with it. We remember how the mother smiled, how she laughed, we remember what in meant the expressions she uses, in the sleep, as she used when she was with us.

So transportation of the man from one place to another has to carry the same. The body .. in the EU, in a flight unit, if he chooses the path of the physicality, should carry all that emotion, .. feeling, and .. memory. When we transmute a body, person, object, we have to carry all the emotions of it with it, not just the matter state of it. This is the part which now we need to understand, before we get to the flight, through EU, before we understand the transmutation and transportation (T&T) in the new dimension (D).

In a few teachings before, I referred to the RNA of M fields, that it carries the memories of, .. where it has to go. One thing which the world of science (WOS) has not managed to understand up to now, how does M field in state of Pl reduces, or increases in strength, or divides. At the moment we have a discussion in the WOS, can a ray of light be bent? Can we bend it, and we look into the galaxies, .. U, (:28). and we see, "yes the light can bend," when it comes near an object, or a .. star or a galaxy. But does actually, has the man's knowledge reached a point to understand, that we can not only bend the M fields, we can break it up, we can divide it. We can split the M field, but there is a method to it. There is a T for it, there is an understanding and comprehension of every part of it, that mankind has not understood up to now.

This is where many parts of the WOS will breakup in what we know up to now. A lot of things will make a new sense, a lot of things will become much easier to understand in the WOS and T. For us to be able to transmute man or an object, we have to understand this. Otherwise we just carry a bunch of energy without emotion, without feeling, without understanding the totality. Without being able to interfere with the whole collection of .. emotions man carries in the D of physicality, and man carries in the D of the soul. We will run into massive problem, because we will be only carrying the physicality, most probably, because it has no emotion, the head will be on the foot, and the foot on the head, and god knows everything else. Because we created the emotion out of the position of the physicality.

We brought a new D into the WOS &T , (:30). in science and technology (S&T) of the creation, not of the man. We have to understand, we have to be able to comprehend the extent of the change, that the new T will bring us. In the coming time, in a very, very short time, man will go into a new ways of traveling, transportation, new ways of communication, new ways of understanding the totality. It's the responsibility of the KF and the scientists who work with us, and develop this T with us, to understand from now on, we just don't carry the voice down the telephone line. Or we just don't carry the man as a physical body, to another place. We have to carry both the voice, emotion and the man in the D of the Pl, not in the D of the physicality. Otherwise we'll be on the way for decades to come, and centuries and thousands of years to go from one star to another.

We'll seen changes in the body of the man in certain "Gs" , 50Gs, 100Gs, what's going to happen? The body of the man (will) tear apart. We have to transmute the structure of the body .. into a D of the.. plasmatic energy with the information, with the emotion, and with the understanding of the, all what has been gathered in that cell, we call the STM, or D of the Pl of the physicality of the man. We will, and wanting it or not, we have to understand this T, T of the creation. (:32). Understanding the method of the transmutation and transportation (T&T) of the not only the plasma (Pl), but the emotion of the Pl. We create Pl by interaction of electrical fields today, and we see lights and we call them the Pl. That's the Pl in a matter condition. We create a Pl in a field condition, that is created by the energy and the fields of what we call, M fields of every part, every cell of, and every emotion.

Remember you made the mark, you burned the skin when you were young, you are in 50s or 80s, that burn mark is still there. But how many times in the cycle of your life, your skin has changed. The layers of the skin has changed every 28 days, and still 50 years down the line, the mark is there. We have never analyzed why. If you are repairing, it should go away, should not be there, because we did not deal, we did not handle the emotion of the burn, when it was physically burned.

If you go back, as we said some time ago, … when we took the condition of a burn through what we call, air packs, what we have in the cars when hand .. and body of the man was burned by the impact. When we used the Gans's, which is the plasmatic energy, there was no sign of the burn. We missed the part, it was just a talk, (:34). The Gans's can do with a burn, without any signs of it. Why? Go in more detail, just not to happen that's it, we go.

But how come, if we get a burn from a match, or whatever, we have it on our skin. Does this mean with the T of the Pl we satisfy, we fulfill the emotion of the damage, into our layers of our skin, in the Soul of the Man (STM) in the memory part of the physical structure. Because it is the brain, which structures, for the cell to change. If it does not change, it keeps it there, you touch fire, you burn. You remember why you're burned. But the emotion of it, is not handled, that's why we see the skin sign. But when you give the plasmatic energy to it, when we do it with understanding the new T, there is no scar, because now we satisfied both the emotion, and the physicality change. This is the part that many of you have done. You burn yourself in the house, and you use Gans's, "oh it went, and there is no scar." Maybe for the first time you understand why. Because in the plasmatic condition, you haven't just fixed the Soul of the Physicality (STP), you sorted out the STM in interaction with STP, and emotion, that "I don't need this." I can repair this, I can satisfy myself with it.

Now we need to understand this, in T&T of the new flight system, we have to understand this. We have to be able to carry the emotion, (:36). with the what we call plasma of the man, when man transmutes from one to another. And get it right when we get to the other place. On earth I move you from NY to Tehran, through the plasmatic emotion. I don't need to carry you with the physical dimension (D) of aircraft system, because you understand the "G forces" so I have to hold you, cuddle you like a mother in the system, and deliver you in the correct way. If we choose through the plasmatic way, I have to be able to deliver you, that the emotion of your sight does not change to the emotion of your hearing, and your hearing to your smell. I have to deliver everything that the eye sees, that the ear hears, and not sees, or it doesn't work.

So it becomes to the point that the world of science & T, has to understand the new change in the world of science, .. the next step in the D of T&T in a plasmatic state. How do you see with the eye of the soul, when you are in another position in the U. Where you got the eye and the sound, the other way around. This is the responsibility of the new research and development (R&D) to get this in that position. As we are going into the D of the flight, as we are going into the new understanding of the process of creation, as we are developing T to be able to deliver the totality of the knowledge, we as Knowledge

Seekers (KS) have to become fully aware of, not after testing and trying, (:38). and then say, "oh, we missed something in the knowledge," .. in understanding, .. in totality of the process of the creating our systems, or developing .. which allows to take into condition of flight.

In these new systems, .. understandings as we see, we have to , we have no choice, but to understand the process of the interaction of the fields. When we come to the point of these units, where carries the emotion, and the STM to enhance, and then we embed these in the new systems of the flight. Where do we go? How to we inherit, how do we correct these things. We are not talking about the future, this might happen, already flight systems (FS) have been built in China. These are the production lines coming off the line, in coming days and weeks, as we deliver around the world. This factory has been setup to meet the demand of the KF. These are the FS, which now is going to be. It's become part of your life, .. of the structure of the KF work in space.

How do we structure ourselves in these systems. That when we arrive at a point of destination, we will, and we become as one. We can deliver the totality. "Sorry the first 200 people we never understood that the emotion has to be carried." We delivered a lump of energy from Tehran to NY. (:40). The emotion was left behind. This is part of our work. This is now, it's not the knowledge of just making systems, it's to deliver T, to understand more of.

It's the responsibility of the KS who are advanced and work in this part. Be it you're on the government side, be it you're on the independent side, be it individually you carry work in your garage. Because your garage most probably, is sometimes more advanced then the government laboratories, because they haven't understood, they are just trying to copy, without the soul of the knowledge, the root of the knowledge.

In this coming time how do we place, how do we get our systems built in these new FS, that we become, and we deliver a totality of system. When we deliver 100 units a month, we have to get everything right. We have to bring new standards, .. dimensions, .. start the delivery of the T in a correct way, from outset, from the onset of the first trial. How do make these systems, .. adopt these FS. This is not a talk anymore. This is the reality, the world of science, the KF and other scientists around the world, have to face. We have opened the Pandora's box, and there is no way for it to close. There is no way for it, to become separated from the rest of the present knowledge. There is a line, .. a border line now, (:42). in sticking to the past knowledge of the matter state, or moving to the state of the Pl transformation, T&T.

We have seen even today, with after 2 years, of we've seen with this plasma situation across the world, mutating and mutating. Now the scientists find out we have nothing to match it. Because accidentally, maybe we found something, which did something with some of it, but we have not understood the root of the creation of the Pl, the interaction of the plasmatic fields. Even in the KF, KS have become limited to understanding of a few things which was given, hand fed, instead of adding fed.

What do we do? Where do we stand? How do put 100 of these units a month, in the next year, across this planet, when they just stand as a shell. Where the T has not carried the understanding of the totality. I can develop to certain extent, that systems can be delivered. But how as the human race we are going to develop the next stage, the next step. When we launched the enhancement units (EU) originally, it was just, what we call, a health unit, and material unit, enhancing of whatever. But now we are in a flight system (FS), we have to, (:44). take a man, and deliver a man in totality. What is the extent of the knowledge. How far we as a KS have come, not to be sentimental about the knowledge of the KF, but to understand the totality of the process of the .. creation of fields, plasmas, divisions of them. Creating conditions of them.

If we go back to one of the very first reactors, which we built in Tehran, one thing which the Iranian authorities and the scientists never understood was, the true secret, which sits within the structure of the KF systems, which sits within the what we call, "clarity of the information which was missed." In a way, we have to, and understand, that the new T, to become part of the Pl T, needs the totality of the knowledge of the man. When we interact, .. deliver, .. bring it about, the delivery of the T is like this, we have to understand every process of it, .. how we create conditions, for the creation of .. energies, plasmas, opening them, closing them.

How do we make a neutron, and us decide the time of division, and not leaving to the hand of, what we call, "whatever might be." When we look, (:46). at this T. When we see the enhancement of the 2 nuclear space reactors of Iran, we now understand there is more to the knowledge. Understanding to create nuclear division, understanding to create a plasmatic nuclear division is the key to be able to succeed to use all the systems you see. When you look at this picture you see the totality of the knowledge, you see the understanding of the totality of what man needs to know to be able T&T across the U, across this planet, even in their own understanding of the knowledge & T. The spaceship from the day it was made, I said, when will mankind see that all the knowledge is needed, is sitting on the table.

Up to now we waited for the nuclear division, we waited for the split of the neutron into the electron and proton. This is the question I put to Professor Leslie in Queen Mary College. I said, "your knowledge is not complete, sir, because you cannot dictate the time of the division." You are here sitting at the will of God. So you have not understood. Professor L told me, Mehran you are too far ahead. You ask questions that we have no answer to.

This is where it sits, .. the knowledge is, .. after 40 - 50 year. 40 years as a nuclear physicist we have to answer. (:48). How can we control nuclear division? Not half-life, when it happens, randomly in a few milliseconds, .. hours, .. days, .. few million years. I should be able to bring that million years into milliseconds, and milliseconds to million years.

The questions I put to you is not something new. It's taken me 50 years plus, to find answers, to find solutions, to see the reason for it. And that division comes exactly the

way you carry the soul, when you create the division, for the Soul of Physicality (STP) to separate, and then create the totality of an atom, or the physicality of the man. To you it is a sentence in past few minutes, to me it has been a question of developing for 50 years. As a nuclear physicists, as one of the leading Pl physicist in the world, to understand how we can change the Pl. We control the Pl change, not the destiny of the time and environment.

This is why in Fukoshima we could interfere, even the American scientists who took and stole, and the Japanese who made billions out of it, never understood it, just worked from - we do it. If you understand that division, if you can control that, when we can bring, what we call, inter-atomic fusion, the electron within the proton, and make 1 neutron, and then decide when we divide that neutron to another electron and proton, but be exactly the same. (:50). To be able to compensate for the losses of the separation and addition of the fields, in cohesion of the totality.

This has been the biggest question. This is one of the questions, that the world of the nuclear has never answered, the scientists in the world of cosmology have no answer and they just jump it. We cannot jump it anymore, we have to understand it, because we are faced with it, it is on the screen. How can I create the division, transportation as 1 unit, as 1 neutron, compensate for the losses of the environment of it, and then be able to bring it back together.

Go back to Book 1 when we showed the Principle, fundamental Pl, when it divides to an electron (E) and Proton (P) it releases some energy, so when you want to put that E back with the P you have to compensate for those losses, but exactly the same, that the environment doesn't take it, but you understand the changes, you understand the ?? station of the field, you can compensate for it, that you go back to the original neutron, not a neutron which already lost some part, when it was divided.

I cannot take you form London to NY, sorry when you get to NY, we lost some energy on transformation and transportation we lost a leg. You go and find the energy that we can put the leg back. This cannot .. this is one of the first things that came to me at the age of 8 or 9, when I sat on the bottom end of the x-ray machine in Tehran. If it comes in me, and it goes through me, how much of me is added, (:52). and how much of me is taken? It took me 30 years to find the answer, and you are taught in 1 lesson. Do you even think about, what you couldn't think?

We have to find, .. understand, that when we transmute a soul, or the totality of the man as an energy, we have to bring the information, the emotion, and totality of it, back in any position in the U, or on this planet, in one form. For you to travel with the speed of light, which passes the matter state speed in the D of physicality, you have to understand how to add the energy, to pass the point of speed of light, in the D of universal light, which we have not understood yet.

The light you see in the starry sky of the man, is exactly when it is produced there and then, and what you see. Not 1 billion, or thousand years on the way. Never heard such a

nonsense in the WOS. Once we understand this, we can be at the star instantaneously, we can be part of it instantaneously. If we can compensate or increase the fields of the Pl of the man, to the strength of the point and position of that star. We shall be there instantaneously.

How long does it take to get magnets, which are the same, to get pulled together? (:54). We have not understood the magnification of the plasmatic fields, .. the division of the M fields of the Pl, and we are still, in Farsi we say, " " we are still stuck in the bend of the street. We haven't understood where the street goes to. We still got the problem, can we bend the light? And how come sometimes light bends? Is it an energy, is it a photon, is it part of the totality? Why some of the light bends. Then if you can bend it, you can divide it. Plasmatic radiation and division of plasmatic radiation, is the next step of the teaching for the world scientists to understand.

How do we create plasmatic radiation, be it in Alpha. Alpha still, we call it, is the energy of whatever. But in fact, it is a plasma. It has a field strength, it has a D and a volume. So if you understand this, we can create Alpha radiation as much as you like anywhere in the U. It's not just what is in your smoke detectors sticking on top of your ceiling.

Understanding the change in the Pl is the key, is the next step for evolution of the science of the man. From now on, we try to open this door, that it is understood by those KS in universities, institutes, and nuclear centers, to understand there is a new way. And then with it, (:56). we literally put a nail in the coffin of nuclear industry. Do I need to create a division to create heat, to build these massive nuclear reactors to do what? To boil some water. To get some energy to change into electricity. Where I can create the diversion and division of the cell of a Pl, and get the energy I want there and then. What is this all hullabaloo going on.

Where have we missed the science of the creation. As a nuclear physicist I set out 40 or 50 years ago to understand this. Now the answer is simple, we missed the truth about the fields, the M fields, the RNA of the fields, the division of these fields by emotion of the fields, and not by accidental condition of the fields. When you sit under a x-ray machine, have you ever asked yourself, "where does this field come from?" How do Philips, and Siemens, and the other people create replication of exactly the same fields all the time? For the bone so much (radiation), for this so much, for liver so much, then we go into MRI and the rest of it.

But we haven't understood, how we do it. How it is done in the creation. We've become monkeys, just copying. When you create x-rays in the x-ray machines, how does it work, and can we replicate this in our nuclear reactors, .. in our Pl systems. (:58). That we create a condition of creating M fields, Pl radiation. Then we have broken into a small part of the knowledge of the creation. When a beam hits the surface and it creates so much fields, and it is always it gives x-ray, or always gives Gamma rays.

Isn't this the same as, we have a sun and a earth, and then the interaction of them, creates Pl fields, that in interaction with the field of the earth's Inertia, becomes a matter state, or

becomes part of something else. What have we missed in the knowledge, that we understand it in one part, but we miss it in another part.

Many of you KS will be lost with the teachings of today, and coming up. But these teachings are targeted at the nuclear physicists, who are in the background listening. This is targeted at the Pl physicists who listen to these teachings continuously. It is targeted at the elite scientists, who'll bring the change in the WOS. As I said, many people listen, and the KS at the front, are just the what we call, educated in the T of the KF, and what it is.

Scientists in laboratories around the world, when they listen they understand. Nuclear physicists when listen, understand where our dilemma is. Space T has changed. We have as a nuclear physicist to understand the totality of the creation of the neutron. With the knowledge we have, (1:00). we become the creator of that neutron. And with the knowledge we have today, in the Pl T, with the KF, we should be able to decide, that division of the neutron to an E and P. Can we understand enough, that we create 2 E and 1 P? Doesn't this happen in the womb of the mother, we get identical twins?

What have we missed in the knowledge of the man. What have we missed in the knowledge of nuclear T, in the advancement of the Pl physics, and in cosmology? Or do we need to make nuclear physicists out of cosmologists, that they maybe see the coherent interaction of the fields, and the division of the fields. From today we know, and we have to understand how to make, M fields to divide, M fields to increase their energy, .. to absorb more energy through to become a stronger. We have to understand the process of the creation of the Pl, what we call the neutron, what we call, the fundamental element. If we don't understand the fundamental element (FE) plasma of the creation. What are we doing here? Back to the cave, rub a few sticks and make fire.

The understanding of the process of the flight, especially in these new systems, which are on the screen, is sacrosanct in understanding the process of division of the plasmatic fields radiation. (1:02). Our friends in CERN are still playing with twigs. Even they don't know how to hold the twigs, but they don't know how to do it. Our friends in nuclear research centers around the world, as a nuclear physicist, you have to change your process, you have to understand you can create nuclear radiation at any level you like, without harming, or being absorbed by anything else to create nuclear damage. If our scientists understood, when we use the Gans's, and we saw the lady going to Japan and using the Japanese nuclear, testing materials, on the street to show what is radiated or not.

You should have understood we have changed the game. The Fukoshima test done by Yuko in Fukoshima, gave a lot of knowledge, but as you are not the man of nuclear, you could not understand what it meant. We absorbed the energy. But what happens when we absorb that energy. What divisions within the cells of the Pl of the material, which absorbed it, creates. Does it split that Pl into more plasmas? Or does it create more energetic, that it becomes something else?

The secret of the knowledge of the KF in the space science plasma T was shown in Fukoshima years ago. But as you are not nuclear physicists, as you don't understand the Pl physics, ?? we've done something at Fukoshima. But we never understood the knowledge and the T behind it. When I saw live what was happening in Fukoshima, as Yuko was showing the absorption and reduction, I was ticking boxes, "40 years of work, correct" (1:04). There can be division - correct. Can be creating other fields - correct. Then step by step allows to add to the knowledge. To put in, confirming the theories, and the practicality of all, what was in the patents.

In next few months as we develop the T, as you have seen, these machines become a flying machine in your back garden, in your cities, we have to have the scientists who understand it. We do not create captains to understand, which button to press, and a manual if something goes wrong, do this and that. The knowledge, the manual, the understanding of the T has to be in the "soul of understanding the T," by the captain. Not on a piece of paper. We have no papers in the U. "Sorry you are on planet Zeus" and what is written on the paper here, structurally, plasmatic-ally cannot exist. There is nothing, no message in a bottle.

But we need to understand it, to get to the next phase, .. to able even to understand the situation with the Pl conditions we have, that has paralyzed the economy of the world today. We ran out of the magic of the 1st, 2nd, and 3rd injection. Now we see, the scientists, they tell us, the 4th injection has no effect. Reports coming out of, as I have been seeing, from Israel. The new 4th cycle has no effect on. We ran out of luck, because we didn't carry the complete, or comprehended the totality, the structure of the virus. (1:06). If you are KS and you read the paper about the plasma, what we call the virus, and bacteria, and the other, you already knew more than the scientists, and the heads of the nations know today.

We have to, we have no choice, and other scientists in the background, work to bring this process forward. We have to understand the process of the creation of the Pl, as a fundamental plasma (FP), how we become the creator of it. Not - it is there. How we become the creator of the condition, of the splitting of it, into a P and E, and than this is what we call the STM and the physicality of the man, and with it bringing the totality of the physicality of the man, as the 2 souls interact. Then being able to get the E back in the P, and make that FP exactly the way it was before it split. "Sorry you can't see with one eye, we left part of the Pl at the division point."

This is the evolution in science. We are not a cult. We are scientists who understand the process of the creation. With what we understand, we have to setup structures, systems, technologies, knowledge of structures that can deliver knowledge of the creation of the process of FP. After … 20 years of the KF, now we go back, (1:08). to the first chapter of the first book, because you read it, now you have to make it. Up to now it was on the book, now it is in the system to flight.

The most fundamental point for all of you is, if the system creates such a Pl? How many of you are the electrons, which going into the plasma of the proton of the system,

protected, and at the point of delivery, we can let you out as you were. Now you understand, the gravity and extent of the knowledge the man needs to gather in the next few months. It's not just making a reactor. It's not just creating a flight condition. It's creating a Pl, that can hold to the fundamental structure of the creation in the U, irrespective of the place, time, and position.

Now as KS in nuclear centers, .. in space systems, in China, in US, in Iran and the rest. Forget about your rocket T, forget your, whatever you made, try to understand the transmutation through the Pl. This is the time to bring the cosmologists, nuclear physicists, Pl physicists and the space people together, and as one group, as one team of understanding create the flight machine, the life support machines of the future. (1:10). These new FS, I already have designed, it's for you to understand, ?? flight. It's not just screwing a bottle, welding something, or whatever, you have to look beyond it.

The biggest problem .. for you KS, and the future space T, is not anymore, literally, what you see, as a reactor, your problem is, sits, when you created these fields, .. conditions, of the flight, when you close these doors, what fields are created inside?

The fields inside are the neutrons. The man walking in it, is that proton, it changes to fundamental principle of the energy transfer of the Pl. You remember in the past, many times I referred to the point that a banana, is a banana in the matter state, as long as it is in your hand. Once it goes in your mouth, due to plasmatic fields of your mouth, now it’s in a new condition. It's in a new Pl state, and not in the matter state. That mouth is the door (FEU) which you see in front of you on the screen, into the system.

We have to understand this process. How now by closing this door we don't just, (1:12). close the doors of the space system, but how would us in systems standing next to you interact with us? Because the fields are not only inside the system. The fields being built between the walls, are outside too. How much of it we can control? How can we stop these system to bang against each other, even in the first flight?

How do we create the protection for these systems that while you are holding .. the baby of the souls inside, you can protect the system from outside? An integrated system, a system that while it's creating a Pl of fundamental structure, can add to itself, that it can hold its integrity, and hold the womb of the mother, the skin of the mother, and the environment outside the mother's skin, and the womb inside, and the environment where the child is grown. This is what we are. We are in a position, and we have to understand this. Otherwise these FS are nothing but cascades, cascades you just make and we leave it there, one day somebody will understand.

It's the responsibility of KS who understand this, especially I speak directly to the Chinese aerospace space people. Directly to the American space scientists who work in the nuclear industry, and into the Pl fields. You will not succeed (on your own). As we saw in China, they invited us and said, can you give us the fuel composition, that we can just fly. I can give you the fuel composition, but you don't understand what's the next step.

Flight is not only objective. (1:14). Because once you fly with the plasmatic condition, you create, you become part of a new field within it. A nuclear physicists, especially a space physicist in a Pl field, has not understood this. It's the job of scientists to (break in audio ..) to layman that understand. Layman is not the one who happens to be on the street, it's the nuclear and plasma physicist, and cosmologists, and all the what we call aerospace people on this planet. They are the lay people, they have not understood, and they need to be enlightened for them to see to the next step.

When we put people in these structures, .. in understanding of the work of these systems, we need to understand the totality of the structure, we need to understand what this structure brings us, what would effect us. What will bring the changes, which we will see in the coming time. Once we install these systems, once we bring these systems into operation, and fit them with .. the latest space T, a lot of things will change. We bring systems, once the whole structure is fitted in, (1:16). the man is not the man anymore. It's the Pl of the man. It's .. the structure of understanding of the totality.

This will bring a lot of D to us, it's not anymore a banana. How can we as KS, bring the whole understanding of the flight with the plasmatic condition? Then we will see the man will change, the man will not be the same, the man will have to be, to understand, to be part of a new T, new understanding, new composition of order of fields. New way to be able to T&T, to be able understand the totality of the knowledge. Then we have to see how much of this we have understood, and how much we can replicate.

Maybe today's teaching, (1:18). opened your eyes, especially those of you who work on the edge of T, to understand this. We have to become the creator of that fundamental plasma (FP), we have to become the controller of that FP. How to be able to split it, and how to be able to bring it, to create a new condition, that allows us as a scientist, as what we call, understanding of new T, to be able to deliver a comprehensive system, that carries the emotion, carries .. the fields of creation, and carries the physicality of the man in both RNA and DNA.

This will be a major breakthrough for a lot of you. This will bring you the understanding of the totality of the knowledge of the creation. If you can understand this, and if you can take it to the next step, then you have gone 1 step further in the creation of T&T.

Maybe, maybe we enter a new D. (1:20). Maybe we come into the position to understand the creation of FP. Maybe then we should be able to replicate the creation of FP. Then maybe we can reach the point to understand the creation of the totality of the creation. Then we would there be a place for theology, and would there be a place for .. understanding of the creation? Would we as a new race of man, for the first time understand partially more to the total structure of the knowledge of the creation.

Fundamentally we can say one thing, and that is, this machine as we see it is another craft, is another manmade craft, with the physical D, (1:22). of the entrapment of the physicality. Once we embed into it, the plasmatic systems the creation of the fields of the

Pl of the creation, within the walls of the system, this craft is a universal FS. In a way, it can travel the depth of the U, that's why it's called universal system. It can deliver man at any point in the U.

It's the totality of the understanding of the knowledge of the man, who has to go and become beyond the extent of the knowledge of today. How would mankind fly with this machine without the plasmatic system inside it? And how man will fly with these systems with a plasmatic system inside it?

How we'll come in touch to see, the grandmother or the mother with a full emotion understanding, with a full comprehension of existence in the D of the M field of the U, and us, in the D of fields of the Pl, as part of those M fields. The connection for us to see the mother, is the connection of the fields, which we established, (1:24). as a division of the cells of the energy of the mother, with us.

The FP is the mother, and the child is that division of the fields, and the strength in the fields. We have not even managed to understand, that in the D of the Pl. How does the energy divides in a plasmatic condition in the field strength, not in the Pl strength. It's not cutting the Pl anymore, it's splitting and keeping the same, the fields of the Pl. The fields, which make that Pl, and at the same time, keeping the fundamental principle of the Pl, and all its information within it.

Where do we go, with what we have in our hand today? What is the position of us, now that we have come to realize, that the science of the man has opened itself to a new D of the understanding, where the FP can divide into, and then in any proportion, it can come back to a new Pl. Or it can return back and keep and create the first and the same FP. Where this by its inherent condition of the fields of the environment will create, what we call frictions, (1:26). and small release to its environment. How can we go back, directly to this (original neutron), and not to this (the new neutron). This is the dilemma for you as a KS, and nuclear physicists. This is the question, which I asked years ago from our senior scientists in nuclear industry, and nobody had an answer. Now as a simple KS you have the answer, you have the T, you have the knowledge to be able to create.

Understanding of the totality, understanding the truth about the division of the fields, is what mankind, will come to understand is the key to the world of new science, is the key to the new world of understanding of the T.

This is where we become a scientific organization and not a cult. Even though up to now we spoke about the soul, but a soul to a nuclear physicist and Pl physicists like me, is in fact, a neutron. I can give it any name you like, the soul, make it to become the STP, and the physicality of the man, a P & E, or anything else you like to call it. (1:28). I can paint it the way it suits your eyes, but it does not change the fact about the knowledge of the creation.

Then at the same time, this (electron), will again be divided into others, and to the others, and to the rest of it. Where this FP in the process of its division and condition, and in the

process of interactions with the fields, which he created itself, will create new plasmas, new conditions, new .. divisions, that the interaction of these fields now creates a new Pl.

Wouldn't that be the soul of the Creator (original neutron)? And this the STM (electron), which in fact, it came from the beginning. I made man in the image of Myself. Because it came from the process of division of the fields of Me. I don't need to divide Myself, as at this point I can release part of Me, that it becomes part of this division. I can interact anywhere, at any position, with anything.

Then you understand some of the names given to the Creator in the Koran, part of the 99 names of Him. If you understand all when you read Koran, you understand the 100, which is this (totality), the 100. (1:30). Understanding He is omnipotent, He's understanding every others, because He radiates the same, depends where you interact with Him. He doesn't decide, it's part of the Pl of the U ?? less than the other. He radiates the same like a sun.

It's you and the fields, which turn and toss, and create the winter and the summer, the black & white skin, and everything else. But in truth the fields of the energy of the Creator radiates amongst all of us. If you understand this, in these fundamental system of flights we create that embodiment. How closer you want to go back, and how you want to withstand the process of creation, even when you are within the system.

As you see the totality of the fields, I create a new field condition. This is why if you understood, I always said, .. I can give you a fish, I can give you a man, in a pot. Because I have the knowledge to be able to create the fields of the U within the water, then as I change the fields, (1:32). with the strength of the fields of the emotion of the soul, I create the man, or the beast, or the fish. One drop, that drop is the energy fields of the creation, which to my knowledge is easy to make, to you is a magic.

Now you understand more about the totality of the knowledge of the Pl T. Now you understand the fundamental questions, which I have put across the scientific world, and professors, and lecturers and the life and the universities, and colleges, and nobody could answer. You as a laymen, as KS of KF, can see and understand, more than professors, and the doctors, and the PhDs, at this moment of time, on this planet.

This is the truth once you understand the process of the creation. How do I make that fundamental Pl, I call it a neutron, I call it a soul, I call it the essential source, to create that condition, with love, with care, with respecting life. Then you understand the biggest question in the world of science & T today. Have the KS understood enough to be able to create a fundamental Pl, and then to be able to divide, (1:34). the fields of the Pl, which up to now is unheard of.

Or can you strengthen the fields of the Pl, that it leads to a higher strength to go more into the center of the Pl. Or can you find a way, by not division, but by giving, that you can go further. That would this further point, at a one point and another, will bring you to the point of the creation. I made man in the image of Myself, and I gave man the rights to

understand the knowledge of the creation. It's for man to understand the totality, and this is the point of manifestation of Mitra, for man to understand, to go back to, and to come from, and be part of the totality, and understanding the truth about the knowledge of the creation. The STM and the STP of the man.

I hope today you understood more, and I hope today, with all of the scribbles on the board, you understood where you came from, where you come from, and how you can become the creator of the next cycle, in the propulsion of understanding the knowledge. It's not just creating the children of the man, it's creating children of the STM, which becomes the knowledge of the creation (KOC) and Creator, and that is what we call the Mitra. Understanding the process, that the KOC and Creator, (1:36). comes back, to become the creation and the Creator itself.
Thank you .. for allowing to share the knowledge, and at the same time understanding the totality. We go for a break and come back and answer any question that you might have.

PROOFING TO HERE << continue

>>> BREAK >> 416 KSW Jan 20 , 2022 (1:44).

Q: Salomea .. coherence between the STM and STP is the secret of balance and equilibrium, so how can we create it?
K- Create what? The equilibrium?
R: Coherence between the STM and STP
K- Partially is the emotion. Partially is the emotion of the man. Detachment and understanding it. This is what you call, coherence. Goes where we totally separate from a lot of things. Because it is the responsibility of every man for himself, at a point where they want, and they ?? know to come back to, and the only part behind, and some part to add to. Is the totality of the physicality, that we have to understand.

This is what I keep on going back to, KF is not a religious group, KF is not a cult, .. is not another organization. It is a scientific. (1:46). A new science. You have to understand the science of it, how it happens. You take from it according to understanding of the knowledge. You don't carry, you don't need any PhD's, or professors to understand. If you get enlightened, if you understand the principle, it takes you a few seconds to understand most of the work. Then you can replicate it. Then people say, "oh, this is this." It's you understanding the way you do. And the way you understood.

I worked with a KS who has no education whatsoever, just finished an ordinary 12th year, with just being brought up in a farming family, but his knowledge of the Pl, is beyond hundreds of professors put together, because he understood the fundamental.

Those who tried to achieve it, or to copy it, to replicate it, it will be very difficult. Because you have to be able to enjoy its existence, and enjoy the knowledge you gained, and to be able to share it, and if you want, to be able to replicate it, that the others can enjoy it.

We see this right across the KS. Each one of them in their own special fields, or they understood something, of they knew something, added up, (1:48). are adding to the knowledge, new things, new ways, new machinery, everything you see coming up, and they put in there a conjunction of this T, and the KF. That's the beauty of it. They implement it, and they explain it, this is what it is from their part. It's the same, connecting the soul and the T and the knowledge together. Then you can do it. Then it's being to share, give and sort that out, which is part of the whole structure and the process. Any other question.

Q: Ed … in a way you answered my question .. I remember the first time you introduced the Gans form Cup 1 and 2, my question at that time was how do we understand how to make the Gans at the proper strength to interact with a certain Pl strength. .. when you worked in your garage, you told us you used to look at the lights in the dark, because you understood the significance of what was happening with the light, the colors of the lights. (1:50). Like what you presented with us this morning, we don't have tools to operate at that level. It seems to me the only tools we have are our understanding and perception. So … what are the tools how do we develop the tools to work at this level?
K- You don't need machinery, .. reactors, if you go back to one of the teachings, and many times I said, you can hold your hand and create the light. You as a dynamic Pl system, we can do this. We can create this, we know how to access energies. We do it physically, we rub our hands to each other, and we create heat.

Now we can hold or position ourselves and create interaction of the Pl of the field of the man, with his aura, you call it, and create the same. See how, what will be the reaction of it, .. the outcome of it. This is the part of understanding of the totality, and this is what we need to understand, we need to be able **to put together, (1:52). a simple understanding of the T**. You don't need to be a magician or a professor to create the two.

When you look at … picture which I put on earlier, and if you understood the principle of what this picture (of EU in EC Linz) means. When we understand the principle, does not matter what they give us. People in villages of Amazon will use the same system, and they'll reach the same, by pots, they don't need nuclear reactors. It's understanding the T or understanding the knowledge counts.

When you look at this picture, in reality there is no difference in application of T in the Iranian nuclear reactor, or Brain EU, or in Body EU. One creates the flight, and one handles the body .. in different strength, and the other, (1:54). handles the emotion. The tools of the knowledge is there, all the same, in all 3. It's application and implication. If I stand a man in this gap, then what will be the difference? You got realize how much you understand of the knowledge, how you explain the knowledge, and how you interpret the

knowledge, and what that interpretation leads you to. (1:56). What you want to gain from it, and how much of it you can accept and you can add to. Then you don't need systems.

I mentioned his, .. the name and of presence of Professor Leslie, the head of nuclear department of Queen Mary College, as head of my department. At that time .. we were on the edge of the science in 70s and 80s, even though we were 40 days (years) down the line of nuclear power. In the final year, and the back end of the 2nd year in teachings, there were no books written, the professors were sitting one to one across the table. That was the knowledge shared. We were reading of their own, they were teaching us off their research papers of their own, or the PhDs, we had some cases where the PhD comes in the teaching of the professor, sits across 3 of us, trying to explain the knowledge.

To me at that time, many times I had interaction .. discussion with professor Leslie, because he was a very bright man. He could understand the lack in the knowledge. I explained to him, why should I accept, because you've written to be acceptable to me, because it doesn't make sense to me. He said, I have no more to share, you know more than me. (1:58). I am learning from you at the time I am teaching you. I said, these are the questions as scientists, as a human beings we have to answer. It just doesn't need to be a nuclear physicist. I remember once he said to me, I look forward to the days in the week when I can teach you, because I become a student most of the time.

We have to understand what is in our hand as a knowledge, and how do we apply it in cases we want, in the conditions we create? Because once you learn to walk, you can run, jump, you can dive, you can do anything. The limitation comes by how much you extend that part. You can run a few meters, you can train yourself to become a marathon runner, .. to become a jumper. Or you can use those legs to become a diver.

It's the same with the knowledge. You have to understand how you want to extend it, how you want to train it, and how you understand it to benefit you, or to give you the pleasure of existence. You'd like to run a marathon, that gives you a pleasure, or you like to be a diver, that gives you a pleasure. But you can be both, if you understood how to use your legs. This is what we are trying to push the KS to the next level of. Understanding the process, (2:00). creating the condition. This is what we as KS expect, extend, and try to find out.

We show the knowledge, it's for you to apply it, according to what you understand of it, in extension of the knowledge you have, or the emotion you have or your understanding of it. This is why the teaching, even you call it, about the soul teaching, the soul is the fundamental plasma. You put a name because you understand it that way. To me a soul is a neutron. How do I want it to interact, .. to divide, .. to be a physicality, or STP as an electron, and create interaction between the two, the atom, what we call the physicality of the man.

I am a man of science, and I understand the science of the creation, and with it we can interpret it in the world of the theology, in the world of the Pl, in world of matter state, or in any shape or form you want. I know how to walk, and I know how to walk the

knowledge of the creation and the Creator. That's all. You can do the same, but you have to be able to, don't create dogmas, don't create limitations of, because I have been told this should be. Accept the knowledge and add to it, the way what you think can be. Not what you have been taught, (2:02). and you are trying to frame the new knowledge in that frame you've been taught. It's not a painting with a frame. It's a U blank, it's you who paints it, and it has no frame, it has no limitation in understanding of it.

What do you do if you land on Mars and you see a new D, "let's go back and ask Mr. Keshe what it is." Or let's go and see what the others say, or you have enough knowledge to analyze it, understand it, react to it, and make the best of it. That's what all these teachings are. Always go back to what I told you, my uncle in Tel Aviv told me, when I met him for the last time in 2000. He said, when a friend or a member of the family went to Moscow and came back, in early beginning of last century, he said, the Russians have a metal bird, it flies. We all laughed at him "metal bird." A few years later we saw the planes and the .. airports. Was it him being crazy, or was it our lack of understanding that the knowledge and T has extended. We were blind to it. This is what it is. The knowledge is there. Are you the man who is in the Moscow, or are you the man who already seen it? And you are one of those who will see it, as you develop more to. Then do you rely on the others to accept it, or what you've seen, and you have decided, and you are creator to the next condition. (2:04). Openness is the key to understanding the creation. That was a limitation to fit into the books you read, is how you have been controlled by yourself and nobody else.

You don't need nuclear reactors. When you look at this reactors here. Next to it you just see a shadow of another reactor…   The reason it is interesting, it's the capability, and ability to make things according to what we have. Many times when I look at this, it makes me laugh, it brings me different kind of joy, to understand how, at the same time as being able to, you are limited by, your own, what we call, environment, your own conditions. Let me choose a couple pictures maybe I can explain it in a much deeper way. When you look at these reactors, you'll understand what I am talking about. Because it is very fundamental, what we have, what we could have, and what happened to us. … .. it's the same reactors, you see the flying reactor on the right side, the mother reactor in the middle, and then you see a metal reactor,   (2:06). … plus its flying system. These metal reactors for us to build. it took us nearly 1.5 years .. the metal have to be brought in from S. Korea. It took the Iranians 7 days because they had the facilities to build it in Sharif University. …

When you have the facilities you do it in a much faster way. When you have other facilities you just take time. This is what the T is, what you can make best of, in what you understand, and then you add your own flavor.

In 20 - 30 years time, down the line, many of the things which now is done by KS, will come open, that they use the T. By the time now, people don't see, they don't see the benefit of it, or they don't understand it, while others are using it. But at the end it's benefiting mankind, and that was the whole purpose of teaching and open sourcing.

(2:08). It's the same with you. You have to be teaching yourself and opening your eyes into the full D of the work.
Any other question

Q: .. Was the divine wind that protected Japan from invading Mongols over the sea and Russians over land, ?
K- Do not know what you are talking about
Q: .. Samaerai offering tea .. (2:10). and have these super powers?
K- What do you mean?
R; He's talking about lowering the heartbeat frequency close to the earth's 8 Hertz vibration….
Q: In Bible Israeli soldiers passed by with screams tearing down the walls of Jericho. In this case is it the same phenomenon as the Japanese divine winds, or the indigenous rain dance?
K- Do you have any comments. Rick ..
R; I couldn't choose between divine wind and rain dance. I don't think it would be the same thing. I don't know what they are talking about. Perhaps it's more they enter into a state where they are more tuned to the physic realm, maybe see into past and future. powers .. the leaders have used priests and seers .. that can tell them what to expect ..
K- You see, it's one way of explaining it as you do. (2:12). Maybe you .. what we see is that if we create enough energy, that we can extend it beyond the boundary, or with interaction of the other fields we can extend it. We could create energy fields, which can cross walls, and god knows materials, or Gans's. This is not a magic. It's understanding how we can increase the field strength or matter field strength, that there is no resistance.

Did they manage to create that kind of fields, through emotion of winning, wanting to rule? The way we sweat when we get excited. The way we grow when something happens inside us. If it's 2 - 3 - 4 turn of the same state, would that or did they create a condition that they could balance the fields of the wall, or whatever, because it was made of brick and mortar. What was that wall built of ?? and a component of it, are within the structure of the physicality of the man, that he can make the Gans strength of. So now that we can explain these things. It’s not that it can be done, is that we have the knowledge, we know how to do it. We know how to expand it and extend it. We can do a lot of things nowadays.

I get a lot of calls, I had a meeting with, (2:14). somebody in the nuclear industry last night for about an hour and a half. At the bottom and top of the conversation and everything else, what I get from a lot of you, "Mr. Keshe can you help us with the side effect, can you help us to stop the effect of whatever, with this new plasma situation." Yes it is, yes we can explain why so many people are dying of heart attacks and everything else, and some don't, and what happens to what.

These things I can clearly explain. Can you stop the effects of the 5G with the, what you call, the new injection processes? Yes you can. We have the knowledge. We saw it yesterday a couple of communication companies in US, stopped using the launch of 5G or G5 around some airports, because of the interference and we saw the first interference

with the landing gear. We watch and we see, and we understand the T. Many of you write to me in many chats, "can we stop the whatever is in the new injections?" Yes you can, you have the knowledge. But you haven't understood how to use that knowledge.

Inherently, when you are injected with anything to your body, be it vitamins, be it whatever, you create that material. It's the same as what I said, when you enter the system. (2:16). This is how much of it we understood. I just received a picture .. from our team in the background, which is fundamentally interesting if you understand it. This is the picture of the flight system (being) put together now in China. There are no reactors built in yet. They are finishing the inside. This now is a mater state system. The guy standing there (in the picture) is still a man.

Once we put the reactors within these walls, then we create a universal system, a plasmatic system. Where the same brain of the man, internal structure, becomes part of the field force. His emotion, where to go, dictates the position of this system.

No scientific organization, no organization if the field of space T, on the edge we are, so openly shares knowledge and pictures. Because we are not afraid, we are looking for extension, addition, and collaboration. You the KS, other governments, other establishments, other scientists.

This is what I explained to you. This is now still a house, a room you enter, (2:18). because we haven't installed the what we call, creation of the fields to make it into a Pl. There is a big difference , there is a massive difference between .. the two conditions. When this system, when this structure is sealed, here you are a man, when I seal it, you are in condition of the plasmatic field, there is no rocket propulsion to hold you. It's interaction of the field of the system. As I said, it creates both fields inside, and outside. Inside keeps you intact and the condition of the Pl. Outside interaction of the fields of the planet or any environment to fly. Inside it creates life, sustains .. and maintains life. Outside protects life, from outside, from what is inside. At the same time finds a position in respect to.

Go back to understanding in what we did, and I wish Rick one day have esthetic pictures of this, that we can use, because we do a lot of work there. When you put a magnet, and put other magnets, (2:20). and you put another magnet, and you put a series of magnets on the table. You got to understand, the fields interacts, creates position. But this is interacting with this too. And part of these fields divides to interact with position between this and this. .. , and collectively creating a new position. Where this one divides somewhere else to this one, and then plus the field of this.

Division of M fields create a condition of MaGrav positioning, and this is what KS have not understood up to now. Why it takes this position, because not only interacts, not only the field of these two, there is a fraction of this field as well, which totality dictates. It's the same with this one, fraction of this. The same with this one, position of, fraction of what comes out of here, as well, dictates position, it's totality. And then with another …

Then we'll see that M fields can be divided. Not only you are in the dilemma can you bend it, we can with the new knowledge, even divide it. But how do you divide it. That's a skill, that's a knowledge and it's done every second of life in your body on planet earth, in the SS and the galaxy. (2:22). This is the understanding of T, of the knowledge of the M fields.

If I put you, as you saw with the man in the craft, and put the Pl condition, I have to bring you here, but at the same time, I have to inform this one, that you are here too. And then be able to transport you, if you want to, to this position. Understanding what I have to gain, and what I have to give to maintain the same man, does not matter where I take him, I deliver him the same. Unless the man's soul decides to go a different way. And the environment changes, and you want to manifest in condition of ?? earth. I want to go to the moon, but still to be a man. No problem.

What conditions around you I have to create to maintain you as a man. The freedom to be able to walk without any clothes. Up to now we sealed you in the clothing, now we seal you in the envelop of the fields, that gives you that condition to ?? make. We create you the bubble, but understanding what that bubble needs to provide you, for you to be in that condition to look like a man.

What happens if the bubble bursts, would you still look like a man, or would you survive as a man? What do I need to add to bring you come back the same? And you become a quarter of size you are. (2:24). Or you become 10 times bigger than you are. We need to understand, once we understand we can apply.

Very soon we'll see the flight reactors in AZ, Tehran and Austria, and then we learn more. Then we bring in scientists to create the fields of the moon for earth, and travel to and come back. But would the knowledge be extended enough by June, that the man will be able to travel as a man, to the moon and come back. Because just ?? getting man to the moon and saying, "oh, you're on the moon" and then bring him back. You want to let him loose, you want to let him enjoy, you want to let him to understand the creation? When you go to sandy beaches of Miami, you just don't want to see them and fly back out, you want to go on the beach. You want to taste the salty water of the Atlantic, you want to touch the sand and how it feels in that water. It's no good taking you there, and saying, "that's it," go back.

But to travel ?? this span in a matter of a day and back, you need to bring a new T, .. new understanding. You need to bring a combination of the knowledge's just to be able to do it. (2:26). This is the problem, that KS have to understand. This is why we are negotiating with NASA. We just don't want a bunch of people from propulsion and trying to force their way. We want them to understand the new way, and see what they can bring in with the landings and everything else, we have to consider what machines we have to make and the rest of it.

This is the key to the next step of expanding the knowledge. Understanding the totality, that the field has a, what we call, RNA, an emotion, and understanding that the fields can

be divided. This caboodle which we carry that, if we can bend the light, isn't that, if we can bend our own understanding, that we bent it ourselves, not to see the reality. Now we do, now we have no choice, we have to, expand the knowledge and understand how to do it.

As I said, this question came to me at the age of 8 and 9, at the x-ray machine. If that thing can create that thing, which goes through me to add to me, or take from me. I want to be able to do it in a free way. I decide, if it is X-ray or Gamma ray. (2:28). I remember when I was just the first years in England, I wrote to my father, you know this new machine MRI, can do more, than what you think can do, and the way it's done is not the right way. He wrote to me, Mehran you come and build it, because I know you think different way, and it might work the way you think.

Because we use matter state electric current, so we are limited to matter state entity and condition. When we use a plasmatic and maybe use same system, the same knowledge, the same know-how, we totally achieve different conditions and positions. What happens in our knowledge, once a gap is in our knowledge, doesn't mean it doesn't exist? We have to find out how we can create and build ourselves on that position of knowledge. I battled for 30 years maybe more, to understand the gravity, but it was sitting right in front of me. Because I wasn't ready to analyze it the way it is. I wanted to force partially, and maybe the conditions which I was brought up as a scientist and nuclear physicist. When I saw the power in Pl, and how you can use the same thing without matter state. The game changed.

KF now is a scientific structure, that depends how much of the science you understand. We shared a lot. You maybe understand the agriculture side, (2:30). somebody understands the energy, somebody understands the other part of it. But everybody might understand 2 or 3 of them, in a true sense, that we can use it. I am not there to show this can be done, just to become a magician. I learned that from MaGrav Blueprint Week. How everything was becoming so ridiculous, you feel it's your right to take it, and if it's not what you understand, something wrong with you. No, there is always something wrong with you. You haven't understood. You haven't understood the principle of the creation of the MaGrav system. The blame is not in the pot maker, the blame is that you don't know how to use the pot. The pot is not for sitting on it. It's for to drink out of it. You are sitting on it. As I .. you have to understand the science not to become copycats. As long as you stay in copycats, you stay in same frame, these past thousands of years. Any other question.

Q: Azar .. (2:32). .. I want a confirmation of this. Today I understand what you explained today, I think the UC has a lot of power. Just like the positioning, of what we have, is sometimes a little crooked. The way can explain it is this, the way I understand it in my mind, you see sometimes how you buy a gadget and read the instructions and you have to add this piece to this piece, … once you add to it a light shows up … manual … (2:34). ..

K- I am going to ask you a very direct question. This question I put to many religious people. It's the first time I put it in public. You talk about the eyes and you focus or

whatever. Can you tell us why, or some cases, where the man dies the brown of the eye (pupil) moves to the top, then being in the center.
Q: That's because that's the place soul leaves.
K- Why does the eye of the man moves to the top of the eye cavity, when the man dies? What happens when it's not, or when it's in different position? Why the majority of the time the eye moves to the top? (2:36).
Q: …
K- why? Even if you are flat on the bed, you look up straight.
Q:
K- if you are flat But one day I will answer this question . .. you speak about visualizing it and seeing it. Maybe some of you KS can answer it. But why does it do that.
Q: …
K- One day I give you the answer. In essence we have to understand what we want to accept and what we want to see.

Any other question

Q: .. (2:38). .. When we look at the neutron its behavior, it's a giver. When we look to the sun for example, it's radiating out and it comes back, and when it's radiating out H, electrons, protons and they come back again. Some places or every place they meet again. H, E, P come back tot the sun and meet with the H which goes out. As we know the ones which come from the outside boundary of the SS have lost their field strength and are weaker, and the ones that come from the sun are stronger. Both are 2 times electron and proton, and now the … then has the behavior of a neutron that it wants to balance the electron and P that comes from the boundary …
.. (2:40). so on the boundary gaseous planets are created, and in the middle planets with waters, then solid planets. This initial

Do I have understood that correctly.
K- You lost me in your explanation, I don't understand exactly what you are trying to tell us. Would you like to try again.
Q: What comes from goes back to. Sun radiates out H they loose their field strength ..

it takes the role of the neutron.
K- There are 2 things. You touched on something, (2:42). which has not been understood, but maybe in reverse we have explained it in the atmospheric condition of the earth. Because our physics is so upside down that it baffles me we are still going on with it.

In the present time with the Pl knowledge, we take the interaction of the fields of the sun and the earth, and this interaction creates a friction between the field forces, which leads to creation of plasmas. **Some of these plasmas, through interaction with fields of the earth, and getting pulled towards it, creates the light, as we see it**.

Some of its packages are kept, the extent that by interaction of the Inertia of the matter state, create the matter. Yeah? When you speak about the creation of the H, the present world of science cannot explain it. But now we can explain in a different way. The center of the (sun). If we change this in way, the same process, but we change it with materials, and the change of the fields, on the immediate surface of the sun.

When, now that we understand the science of the Pl and the Gans T, we are adamant, without a shadow of a doubt, (2:44). the center of the sun is not hot. It could even be at the freezing temperature. But as the temperature has nothing to do with the Gans's and the Pl, it creates a massive interaction of the fields, that this creates a large, a very strong M and G pull. The interaction of these fields, with these packages of matter state, what we call, could be H plasma on the surface. The same as it created light here (on earth), will create 2 conditions, the light, or as a field energy, the interaction becomes light for us. It's not a light, that enlightens the whole of the solar system (SS). And partially in this interaction we create heat, because of the density of this layer and partially the same history goes on. Packages of fields are created, which are released in the SS.

Everything is not at presumed today, in the strength of the M field radiation. This interaction by law of physics, by understanding the Pl T, lead us, has to, and it definitely creates packages of the Pl, which are floating on a continuous basis, or getting attracted by different processes in the SS, (2:46). and they are in the atmosphere of the SS, some of them go beyond.

So we don't create H on the surface of the sun. We create Pl fields of a spectrum of Pl strength. Goes back to waves and particles, fields and photons. What is accepted and understood in one, is applicable in all dimensions of the system, it cannot be any other. And the interaction of the strong fields from the Pl in the center of the sun, with the plasmas of the lower strengths, which are created on the surface of the sun, creates the heat.

It doesn't meant that the center of the sun is hot, and it does not mean that only H is on the surface of the sun, it is accumulative combination of fields. What we see, has a very strong theory in the background of the centrifuge in reverse. Where you have the center of the sun creating massive G and M fields. In the centrifuge, and in a vacuum, the heaviest goes on the boundary, and the lightest goes in the center. That's the theory of the centrifuge. But sun rotates at a lower rotation speed, to create full condition of Pl condition, (2:48). and the centrifuge. So what we see primarily, is on the surface of the sun, field strengths of H plasma. Where does the heavier element created go? (draws a line and mark outside sun).

In the world of science (WOS) as I said before, you can't be prejudiced, you have to have answer for everything scientific, not just because Mr. Keshe says so. It's just because scientifically has to make sense. This is why we are not a cult. Just because somebody says, we accept. We are given the freedom of analysis, understanding and developing.

If at this level, we see, we add to the layers of the earth, by attraction, by creation of Pl conversion to the matter. The same thing should apply to here (sun) in a plasmatic condition. But we are in a centrifuge vacuum condition, why do we get, or we claim to have only H on the surface, and as you said, because this is the way you understood, the H travels the span of the U. This system creates on the surface of the sun, particles and fields, it cannot be any other. (2:50). But particle in a Pl State, fields created from interaction of the Pl states, 2 plasmas interact.

Scientifically with what we understand, what we have in nuclear reactors, in Pl T, we have achieved lift and motion. We have seen creation of gravity. We have seen no heat inside our systems. We deliberately created a system to confirm this. If you go back, I'll show you how we know this, you just don't accept this because I say so. Because this was part of a research, when we built this reactor.

We wanted to see if the center of the Pl in the reactor has different temperatures. The answer was clearly, clearly no. We found actually, in a couple of tests, that we were lower in temperature inside. Because … That's why we went completely into the plastic, or what you call, PVC systems. … this and this picture, if you look. Dean … … (2:52). ..

When we did this development, we considered if the Pl is heated inside according to the present knowledge. That knowledge was there 15 years ago. This was built in back end of 2007 - 2006. When you look at this brass part, it's in rings. We inserted tubes into the center of the reactor, in different positions to measure temperature, Pl current, Pl flow to understand the interaction. In tests, physical tests we saw no rise in, even in the flight condition, in the Pl center position. This is why the new FS you have, can work at room temperature. Because we are not in the dilemma of high temperature fields Pl, we are not in the cold Pl fusion condition.

We understand the process of the creation, and the Pl. This confirms to us, this test 100%, that the surface of the planetary system. … you see these rings, and you see there is a probe in each rings, goes to the different depth of the reactor, (2:54). in both of them. This is a FS support and the other one flies. And you see it, each ring is connected to different depth of the Pl, and at that depth we can change, the …

We can see or change the Pl composition. What happens if we change the Pl inside at a different rate, we didn't touch the inside of it. If you look at this system, it's very simple, … If you look at this system here … This one goes to here, this one to the center … the 4th one to another position … And this here, tests the envelop, the Pl here. This tests here … and the same here. So you could increase gases, and change gases, (2:56). to the systems and see what happens, by keeping it at a centrifuge condition. We could dictate where each layer sits, what sits. We could take the outer layer off in a specific way. We developed a T for it. We could take this layer off, and allow radiation fields in a plasmatic condition to come out. Create an aura. We decide the strength of the aura. We decided what will be shown and seen here. I spent nights and days in the lab testing these.

This showed us, we don't need steel, and all sorts of things to create to hold the hot Pl. Temperatures, current flow between layers, was continuously giving us information.

I always said, the biggest mistake Belgium's made, was letting me go out of Belgium. Where in Bruges we were just about to complete the most advanced FS control. This is to understand on the surface. Here by changing the composition I could decide if I wanted an aura. In a way, we call it aura. I call it plasmatic field shielding, defense T. (2;58).

Yesterday I .. was talking to the most senior American military officers and I explained to him, play a game with us, we become equal. Work against the KF, you loose. He said, Mr. Keshe we'll put one of the top scientist very soon to take this matter on. Because we don't have a choice anymore. We are moving T to AZ, we have to deal with American military. We have to deal with Americans military space T. We have to deal with Chinese space and military. They have to understand the game has changed. We have structures, we have technologies, we have built systems. But we have scattered the T so much, that more or less, only me knows, where I got to bring what out, to put together, and what to get.

It's the same here when we changed it to half a sphere, we created the same, but we saw the dome different. It gave us a stability in flight, .. in control. Here we are at the mercy of the environment. Here I control most of the things, because I don't allow the bottom field to rotate. Here (sphere reactor) the Pl continuously turns, and creates that field change. Here I don't have that, they only can interact. That's why the FS are that way. Even if you look at the new reactors, (3:00). we have given you … We have given you a platform, and … here at this platform .. we have built the EU. If you look at in reality, it should be … (3:0?). .. instead of making a system, creating and doing this to half a sphere, all we done in the new system, we brought the half a sphere slightly lower, that allows us to create a home, a dome. With this, instead of loading you from under, we load you from sideway. But in a way, the other half of this system if you look at it, sits here.

By controlling the reactors in the structure, we can create that, what we call, the fields around it, and create that sphere plasmatic-ally. (3:02). It doesn't matter what is outside the skin of the mother, the shape of the child, the face of the child, is decided by the mother inside. It's not only the fields inside, which we look at what you are going to give us. This system is 2 sided, creates both inside and outside.

Nothing has changed, because we know how to walk, we can run and jump. That time we had to be half a sphere, now, we don't need to be half a sphere, we can be any shape, because we can make that shape. But with the Pl T we have access to now, we can make our spheres all the time the same. I need to change a few characteristics on this reactor, then this reactor, I create a good enough homogenous sphere.

We just solved the panel of the control system. Rick can show us, it was shown in part of his teaching this morning, all those knobs is to control everything. This is a scientific organization, and just because you don't understand it, or you think of it, doesn't make it what you want to do. Everything is tested, everything is composition to be. All I have

done, for me to build a .. massive structure, that to become this, (3:04). as a UFO, and you could get in it, I needed a huge air hanger. What I did, I changed it to this (FEU) , and you walk into the dome. But this (huge UFO) was to create the fields, now I use my reactors to do the same. I changed the shape, but with controlling reactors I keep my fields.

I am a genius in what I do, because I know what to do, because I understand the T. We are Messengers of God, and we have access to the total knowledge of the Creator.

I am the Methi for those who have doubted it. We know how to bring man to the point, but it is for the man to understand how to get to that point.

The new EU still will create fields, both ways, and I said before in the teachings, we built in the structure of the systems, that these fields do not become dangerous to the system, or to the structure of the Pl. What supports life through the blood structure, supports life in the U, according to the field interaction. It is to understand the T, .. the KOC, then you can create whatever you like, and we understand the totality. (3:06). Enough for the man at the moment. When the KS and the scientists of man, become more educated they will not be happy with this crumb, they'll want more of the cake. Then we teach that time, about the cake.

You've got to understand, a lot of things are in front of you, but you don't see it, a lot of things are getting done. We have to do the tests, that the man sees there is no magic.
Any other question.

As was said in the NACT last Sunday, sometimes we learn more in the question time than the teaching side, according to what we want to understand. The knowledge has to be shared freely, but you have to be able to understand the knowledge that it can be shared.
Any other question.

Q: Kay, …   (3:08). … to unravel the way for us … When we do get to this spaceship .. as it happened with disabled children. God ever forbid, that we could not manifest on the other side, and the soul could not gather up all the physicality, and something's missing at the point of arrival. Is there any way the soul can recoup the rest of the missing parts, so to speak?
K- There is a T for it, yes. In time we teach. It is like when we see the situation with handicaps. It's very much, as we open the KFSSI, we have at the moment planning a number of researches to be run immediately on its establishment. One of them is the condition for children who are born with brain damage, or structures with the birth tunnel, with lack of O, or other whatever happens within the womb of the mother, and the birth position. (3;10). We see these as with different names. They come up with when they become older r whatever.

The KF, one of the first researches we launch, and I will take charge of it fully form the beginning. now that KFSSI has been written in to become a company. Is this T, this part

of the T, which refers back to what you said, what happens if we deliver missing or partially not working. We have the T, and this conditions, which is now bothering many parents, in children being born with a lack of O, and we have different names for it.

We have the knowledge and we can change it. It will be one of the first researches .. … to prove to show, that children with brain damage, born with a lack of O can be, during the first year of life, be corrected, and develop the brain fully, that auto mechanism of the system of the body .. can go perfect. We don't get handicapped children. I have been asked this many time. That, can they be helped, and yes, it can be done, .. (3:12). we have the knowledge to do it. It's exactly that, what you call it.

If we can do that with the .. the position and brain of a child, we can do that with the delivery of a man (in FS), if something goes wrong. But we need to understand how. To what extent, we can interfere and change. I do not think a child should be brain damaged or physically impaired due to a few seconds at the time of birth. We have the T and we put this into research. This is one of the first things we'll do at KF Institute .. research into change of the .. new born babies with such a condition. If we can do that, we can do that in our FS. Yes we can be done.
Q: … for all those handicapped child and it's not fair. …

K- They have the same with the injections, the 3 childhood injections. The triple injection mix now, creates a lot of this. This now can be changed, using the new T. This will be another one, people with the side-effects in their children.

The new side effects with the new plasma problem we have around the world. (3:14). We have the knowledge, and this will be part of the first developments of the KF research Spaceship Institute. This is partially why .. we said, the 48 units getting shipped to AZ, part will be given to the American military for changing their mental condition. Because now we can rebuild it, .. restructure it. This takes a lot of pain from a lot of people. We have the knowledge. It's not beautiful it's knowing the knowledge and science. Thanks to our team in Austria we'll see these rolling out …

…>>>>

It is something we have to understand, it's the same as now we understand, the problems with the (virus), what they call, the new injections with different materials. You can stop all the damages and use the best part of it. The combination of the two creates a beautiful condition to be able to recover.

Q: I am glad to hear .. because so many people are impacted with what's being rolled out, and they are carrying on pushing to be rolled out further. …
My 2nd question. you have the key to the creation so you know how to create, the Materials EU is one of them, .. you talked about before.. you talked about creating, (3:16). a fish in a tank, or a human, as you mentioned earlier. If you were to create a human, or give birth to a human in a tank, what would happen to the RNA and DNA, as

it is not coming from the 2 souls of the mother and father. What would happen to their experience, emotion and to their looks, because this is a new creation without any previous history of RNA DNA are they going to be the same human as you and me, not you definitely, … ?

K- We are not creating a new people. And if we do, the same as when we created the Cu and Zn, in the lab in Austria, they carry the essence of the soul of the creation and the U. This is the essence of the creation of the Mitra. We create the soul first, before we create the physicality.

So when we test the materials, which we produce, you cannot see it having any origin, because it is created from the fields of the environment. Even though we used Cu or Zn, or whatever in producing them. They are fields of the U, not matter state of position of the earth, where they came from. If you were in the diamond business, by looking at the diamond, you can tell if the diamond is from the ocean, .. mine, or .. from a river. (3:18). If you become more .. in depth of the knowledge, you can say from which river the stones come from, the majority of the time … you can tell the origin. You can do that with most of the mining goods as well.

But when you tap into the U, and universal energy you create Mitra. You create the soul of Mitra, which give D to its physicality.

Q: I thought …. because of Inertia ..

K- What would happen if you created in the middle of space? You'd become one of those people, nowadays born in the airplane, and they have earth nationality, then what nationality, they have a UN passport. We don't have such a thing in the space.

But it comes to the point, that would we become the Creator, and create Mitra to have a companion and a lover. Someone to love and love back. What happens when you have this knowledge, and you have the machine, and you are the last man standing? Would you stay a hermit on your own, or use the machine to create a soul to create a companion? This is the depth of the knowledge we give, (3:20). but it depends how much man understands.

Q: … considering the fact it has a lot to do with how far humanity can push it. … Because if you see what is happening in today's world, it's a ?? where humanity is being forced into this virtual reality, in order to find some sort of love, peace and calm, because of this rat race life we have created. Being able to create a companion at strength of Mitra would be an absolute blessing, obviously humans are a little bit funny, they could take Mitra ?? …

K- Actually Mitra might not become funny in physicality (laughs). ?? This is questionable, because we are conditioned on the condition of this planet, and the environment of this planet.

Q: I am sure Mitra will put every soul in right direction once it has been created. ?? …

Understand that the STM has create the physicality, comes from the same source, from the Creator. So far you have explained that once we die, the soul takes different D & position according to what the physicality has created, STP. It takes position according to what STP has to offer at the point of departure. I still do not understand that, (3:22). why would the STM, which is from the Creator, peaceful, got all the knowledge, nothing but love and compassion, .. would eventually find itself in a worst position, as you said, those who did crime, and genocide, they become specks of dust. Why would that poor soul, has to get to that position, just because the physicality has been misbehaving and ?? How is that justifiable?
K- The thing is, you have to understand, the STM, even though it is encaged, still it is responsible for the man. How come when you get enlightened through the soul you do good things? So the soul has the responsibility, this is what it says, it's responsible for the behavior and conduct of man. Partially it's what we let the soul, to allow to reach the D of physicality.

What we see has to do with what we understand, with what is to come, what is to deliver. As I said, it's very strange, KF has taken root, or it's headquartered now in Austria, where less than a century ago we saw mayhem in this area. Beginning of one of the largest mass killings around the planet. Why did we have to come here to get root? To put it right the soul, or the souls, or to bring it back into the position to be. (3:24).

There is a reason we are here. It's not, even we came here coincidentally. But souls bring us to the point of where it be. Maybe a lot of souls in this land need to be elevated to cover for what was then, and still carries within them. We do not know, but on the D of physicality we can never say so.

Because the STM has to interact to elevate. And it is responsible for what the STP does. We all can kill, rape, and torture anyone. What does our soul say? It's wrong we don't do. This is why we say, this time we elevate the STM, that it never does a crime, because it is responsible for it. We don't frighten you with the Church and the Cross, and what you call it, confession box, and punishment, and the Day of what do you call it (Judgment), doctor ?? or whatever you call it. It's the maturity of the man and allowing his soul to take over and be expanded.

Q: Thank you .. I hope the plasmatic world is behind you to get this mission and get it done as soon as possible …
K- Yeah, 7 billion of man is opposing it. That's the hardest part.
Q: I am sure they are coming your way. We do all our praying, I am sure the rest of humanity will be coming your way.

K- .. Don't forget something just because we don't talk about it, or push it, or bring it to keep it at the front. It's the responsibility for KS and the UC, (3:26). to carry on supporting the peace negotiations in Vienna. We have broken through, and we see the end of the tunnel. We see a lot of things to break down, and thanks to everything else, to keep the support for it, to expand and to extend.

We have a special request. One of our dearest friends of KF is in the hospital. We hope, we need the support of the UC, for that soul to find position and peace. It's come to our attention in past 48 hours. This soul needs a lot of support an help. This time you don't have a target to hit at, by name, by nation, but for you to support the soul of this KS who has been amongst us for a long time, and we all know, to be supported to be able to go through this terrible time in the life in the condition he is in. We hope to be able to overcome and break this point of our ?? ship in this life.
Any other question.

Q: Guatua I have 2 questions … (3:28). First explain meaning of Methi… in depth. 2nd, you just said the KFSSI is now headquartered in Austria, what does this mean in terms of you working within Iran.?
K- Go back to your first question
Q: … What is Methi?
K- Methi in Farsi language, in the .. Persian or Shia language or same in Islamic world, is the one who brings man to his rightful position, and bring a new life. To change the man and everything will be perfect, that the man does not know crime, and we understand the totality of the creation. That's what it is, the Promised One who completes the cycle for the man, bring that what we call heaven, that there is no crime, no hunger and the rest of it.

So with the knowledge we have fulfilled in knowledgeably, not by talk. In the essence of the scientific basis, you all know how to feed yourself, you know how to elevate your physicality, and you can do a lot of other things, that you don't need to kill. (3:30). It's the time when the man chooses to switch. Secondly it's the fulfillment to understand the Creator, as to be one for all. This is another promise of the Methi, and this has been fulfilled by the teaching of the KF.

In a way, KF as a whole, as the KS, we all become the Methi. In a way, we have understood the process of the creation, and we have to choose when to switch. At the same time, we have understood that there is no need for a temple or a church, or whatever, to understand the uniqueness, and the unisons fields of the creation of .. the Creator. So with the understanding as we did, in the teaching today, you change that soul and the physicality, the neutron with the electron and proton, to the Creator and the man. It's all the same.

This has been the biggest problem for mankind. This is the promise of what we call Methi, competing the cycle of understanding, both the physical and the soul development, that they are both connected through the understanding of the science. Not rhetoric, and hidden beliefs, that we don't explain. This is what the problem is, and this is what we call the Methi, this what we call, the Promised One, return of Christ, the .. Messiah. It's all the same name.

It's the wish of the man to get to the point, that he understands all, and corrects his way. Not by fear but by understanding the knowledge to understand the totality. So when we say we are a Methi, it means we have understood. We got to the position of

understanding and we share it. (3:32). Then it is for others to understand, from what we share. If you understand and don't share, it becomes like stealing. We understand that, and we share, and this makes us Messengers. We pass the message of what we understood, and what we deliver.

On the other hand you need a soul to be enlightened to a level, to be able to understand, that he can guide the others. That is the job of .. the KS. This will create huge problems for .. the KF, and personally for my life. The term of my life has been to end this, that the people don't become enlightened. It's not a stopped. Because the knowledge we share creates that condition of understanding and enlightenment, for the others. This is what the world religious leaders and world governments are afraid of, educating the people. Because when you educate people, you can't abuse people.

We've seen that in the history of Iran in the past century. Iran before the 1970s was 90 - 95% illiterate, and Mullahs and Ayatollahs could say anything, they could not read Arabic or understand Koran, they made whatever they liked. Because they turban, people believed them, because they couldn't read. Now 95% of the nation is well educated. They don't understand rhetoric, and made-up. Then cannot accept, because they cannot fool anymore.

When it comes to that point, it becomes end of the term, because people don't accept. (3:34). The same thing is in Vatican, we see it in Italy. People don't go to church anymore, very few believe in what the Pope says, because there is so much abuse in that building, that people start looking into what is the truth, and what is there, and do we accept what they say. Because they get educated and decide.

That's what is to come. The Promised One, the final .. the PO is when your soul gets enlightened to understand the truth, about yourself, and your creation and your Creator, without anyone in-between. This is why we say everyone of you is Methi, because you have to get yourself to that point, to that threshold. This is one of the reasons KF teaching are banned from all televisions, and everything, because once people understand this, we don't need them to control. But we ?? don't need the television to reach the STM, to reach, and it is very easy. But the STM has to be educated.

So when we say we are Methi, all of us are. What we call, it's our own understanding of elevation of our own soul. Your job once you understand, is to share. Otherwise you'll be deprived. A pocket when it is full, cannot receive more. You have to empty the pocket, that you can get more in. That you can share more.

It's .. life is like a swimming pool, and it's got … a pipe and a tap, (3:36). The pipe gives some putting the water in, and you got a control, when it reaches to a level it doesn't let anymore to come into the pool. Unless on the other side of the pool you get a bucket and empty, and take out with. Then the floater goes down, and more can come in fresh.

That's the responsibility of the KS and every Messenger. It's a pool of knowledge and we stand on one side of it, and we spread out, take more out, and the more comes in through

the fountain of life and knowledge from the Creator. You're that man with a bucket in hand to water the plants, which is the life of the man, and let it grow, both in physicality and the soul.
Your second question .

Q: .. My second question is .. KFSSI now officially head quartered in Austria .. what this means in terms of you working in Iran ..?
K- We came after the incident with Fabio, which was planned, and those who, (3:38). we kicked out of the KF knew about his, my assassination, which happened by accident, become his. They thought they will finish the KF. I could not teach in Italy anymore, because the burden of the death of Fabio was too much.

We moved out of Italy, of it moved out of Italy more or less, to Africa and then to China. Then by whatever we came to Austria. Knowing the situation living in England, Belgium, and then from there to Italy, then Africa and China. Coming to Austria we found a peaceful nation.

You'll be amazed how safe this nation is. Safety and living in peace is one of the cornerstones of my life. I never was allowed to have peace. When I chose and we came here, we found peace, and then peace came into my private life, by getting rid of those who were agitating, and continuously creating, and informing the government to kill. In staying in Austria we found a peaceful nation, where we can support in a professional and legal and correct way the structure of the KF. To that means, I set out with the help of the Dr. Klaus Prille to setup the condition for the establishment of the home base for the KF, then what we went from country to country. (3:40). In Italy we couldn't have, established we went from the north to south, because the misconduct of the person, who we kicked out of the KF. It became impossible to live in the house in the north where we started the KF SS Institute, which were conditions of absolute misconduct, which became public to the whole area. We could not stay there anymore, and in the South it became the same. Then we found out, it was also getting poisoned, and ??

We found peace in Austria, and with it a permanent home. We established the first company KF Austria, then .. now there is about 7 companies under .. KF Austria, and most of the subsidiaries worldwide, except Markray, is controlled and held by the Austria company, as the parent company. KF Space GmBh, which allows us now to become a space organization. KF space program has always been on the Internet and teaching on the back of structures. Now it's an independent flight systems company. We can test, produce, manufacture, we have been given permission by the Austrian authorities. Then we setup KF TV on the same way. Now the KF space institute has become a registered company. We physically are opening a university, an institute research center . (3:42). It's not anymore that you come on the teaching 9 to 5 on the Internet. We are securing premises for an institute here, and then it moves on to AZ and Tehran. There is negotiations with Chinese government to extend institute to Beijing .. .. All even the Chinese and .. other structures … now we can do research .. let's say effects of Corona, because we are an institute we can … do the research officially. This is the change …

Now we can do it as an institute , publish papers, and bring other world scientists. .. a legal structure that we can work …
Not only we bring the KS, but the scientists from around the world to do research the way we do … systematically, with everything that fulfills the scientific criteria.
KF institute (3:44). .. Now has a physical structure as an institute. .. we do not make it into a university, .. because to make it into a university we have to give degrees and all sorts of things. Keep it as an institute allows us to do research, straight on top of the market of the science. Then we'll see the next step. KF now as a company in Austria. ..

7 companies, parent is KF Austria ..

same thing in AZ.

Now setup the same thing in Tehran with Yosef.
(3:46). but headquarters operating out of Austria.

As I said before we bring experts to do the job. I explained what we done with Markray. You'll see Markray will on the supports and the lending from KF will start massive development in US and research.

But that's when we complete agreements with Markray and we push to the next steps. Markray forward planning is to come into NASDAQ, and that way we allow most of the KS to be involved in a deeper way. In what we call, what they want to be part of, to be done in an international level, we brought experts, thanks to Armand and John and new team which has joined in. We have brought international auditors into the Markray, and everything you will see will be reported perfectly, to create a condition, that becomes the backbone of the spread of the T around. We have the same structure now with KFSSI .. Tehran AZ, and other places .. with team of experts ..

(3:48).

It's not just on the Internet anymore.

We changed in the past year, because there is nobody to report or stop us ..

We expect a massive expansion in many directions and we feed it back too. That's why if the UC can actually do their job properly, (3:50). you can tell us where you want the next FEU, by the institute which is the research center of the whole lot, has to be happy with what is done.

We are not just sending a unit to be there so some people, kids in the university to play with. Your nation has to become a player in the space T. Not something just come in and kept in the back garage or part of the university. We have become professional and we work that way. We work with the KS who actually carry the expertise and outside expertise we have brought in.

Now if you want something done with the KF you have to go to the institutes to work with us, back as advisers and see how much you can ?? We keep our eyes open, institutes can be interfered with too. But now we work with consultants ..

It's not anymore if you kill Mr. Keshe everything stops, now you got to kill hundreds of people to stop this process. So we done it gradually. Bunch of pedophiles in Belgium and Linz
.. KF has become now, (3:52). an industrial organization. We are not a company anymore. with Austrian government we have become an industrial, which means we bring industry and governments ?? jobs. KF from now on is an industrial organization, not just KF. GmBh is an industrial …
We'll become a massive workforce and to Austrian …

(3:54).

Any other question

Q: …
K- You know I love Africa and I tried many time to work with Africa. (3:56).
We have setup a structure for Africa and you'll see us coming up in a very solid way .

Q: .. it doesn't get better than Kenya …
K- We were about to come and have a conference with you, but the Corona came.
Shall we call it a day.

(3:58).
